

Energy Deals for June 2026

There were 14 completed U.S. private equity deals in the Energy sector during the month of June. The number of deal transactions decreased 39.1% when compared to May's deal count. There was a 26.3% decline in the number of Energy deals compared to June 2025.

Energy Deals for June 2026

Company Name	Description	Deal Synopsis
Air Liquide (Biogas Production Assets in United States)	Portfolio of biogas production activities located in the United States and France. The activities include six operating landfill gas-to-Renewable Natural Gas sites and five operating farm waste sites.	
Apex Clean Energy (28 MWdc Illinois Community Solar Portfolio)	A portfolio of 28 MWdc of community solar projects located in Illinois, United States. The portfolio comprising four 7 MW projects spanning Ameren and ComEd territories will deliver bill savings to residents and businesses through the state's community solar program.	
Commonwealth Associates	Operator of an engineering and consulting firm catering to renewables, utilities, manufacturing and industrial, education and healthcare, and government sectors. The company offers a range of services such as project development, power process analysis, solar PV design, grid interconnection, and more.	
Cypress Creek Renewables (104 MegaWatts Community Solar Portfolio in Illinois)	A portfolio of 104 megawatts of community solar assets located across Illinois. The portfolio includes 16 advanced projects spanning 14 counties in Illinois.	
Great American Gas & Electric	Operator of an energy retailer intended to serve natural gas and electricity to commercial, industrial, municipal, and residential customers. The company offers a range of products and services that include energy consulting and LED lighting apparatus, along with natural gas and electricity, enabling hospitals, office buildings, schools, property management companies, and country clubs to lower their energy costs and manage their carbon footprint.	
JDC Energy Services	Provider of energy engineering and construction management services intended to improve energy efficiency and infrastructure performance. The company offers energy audits, project management, design engineering, commissioning, and energy optimization services, enabling public and private sector organizations to reduce energy costs and enhance operational efficiency.	

Company Name	Description	Deal Synopsis
LandGate	Developer of an online real estate and energy deals marketplace designed to digitize energy and infrastructure, and merge it with real estate. The company's marketplace offers tools for site selection, origination, development, financing, and market analysis of United States energy and infrastructure projects, such as data centers, energy storage, electric vehicles, solar, wind, carbon, and natural gas, enabling investors, developers, real estate professionals, and property owners to connect for commercial real estate and energy-related transactions.	
LOGOS Energy	Operator of an oil and gas exploration and production company intended for the energy industries. The company focuses on developing existing assets and pursuing acquisitions of additional producing and non-producing properties, thereby intelligently and efficiently deploy monetary and human capital to acquire and develop oil and gas assets.	The company was acquired by Sixth Street Partners through a \$1 billion LBO on June 11, 2026.
PASCO (Other Commercial Services)	Provider of building automation services intended to improve building performance and reduce energy costs. The company offers building automation systems, energy management systems, HVAC controls, lighting management, preventive maintenance contracts, and mechanical system repairs, enabling commercial and healthcare clients to monitor and control building environments remotely to optimize energy usage.	
PDS Energy Information (Four Operational Data Exchange Platforms in United States)	Operator of operational data exchange platforms intended to serve the upstream energy industry. The company specializes in completions coordination, well data distribution, production data exchange, and water logistics platforms, thereby enabling energy companies and working interest owners to manage operational data, coordinate well activities, support production accounting workflows, and facilitate the disposal, reuse, and trading of produced water.	
RRC Companies	Provider of engineering services intended to optimize utility-scale renewable and traditional energy projects. The company offers owners engineering, engineer of record services, project development support, geotechnical engineering, structural engineering, and field services, enabling energy developers and owners to mitigate technical risks and reduce construction costs through integrated design and technical consulting.	

Company Name	Description	Deal Synopsis
Star Electrical Services & General Supplies	Provider of electrical testing and high-voltage services intended for industrial and utility sectors. The company offers electrical acceptance and maintenance testing for substations, circuit breakers, and transformers, alongside Personal Protective Equipment certification and infrared thermography, enabling organizations to maintain power system reliability and comply with international electrical code standards.	
Vanguard Energy Partners (Operations and Maintenance Division)	Provider of operations and maintenance services intended for utility-scale and commercial renewable energy assets. The division provides specialized technical field services and remote monitoring for utility-scale and commercial solar and battery energy storage systems to ensure long-term project performance and operational reliability, enabling asset owners to maintain the performance and availability of their renewable energy infrastructure through lifecycle support and technical expertise.	
Well Master	Manufacturer of plunger lift systems intended for oil and gas well production optimization. The company offers patented jetted technologies, spin-cleaning flutes, energy-absorbing springs, weld-free unibody lubricators, and automation control boxes, enabling oil and gas operators to enhance well profitability through durable artificial lift equipment.
