

Information Technology Deals for July 2026

There were 91 completed U.S. private equity deals in the Information Technology sector during the month of July. The number of deal transactions increased 2.2% when compared to June's deal count. There was a 26.6% decline in the number of Information Technology deals compared to July 2025.

Information Technology Deals for July 2026

Company Name	Description	Deal Synopsis
3D Technologies	Provider of educational technology consulting and systems integration services intended to support student information system administration. The company offers custom programming, software integration, cloud hosting support, reporting capabilities, and financial aid consulting, enabling higher education institutions to streamline administrative processes, improve system interoperability, and enhance operational efficiency.	
A2D Technologies	Provider of well data products and geological datasets intended for the oil and gas industry. The company offers well log libraries, geological interpretations, production and completion data, pressure data, directional surveys, and analytics-ready subsurface datasets that support reservoir characterization, drilling evaluation, and exploration planning, enabling customers to make informed development decisions.	The company, a subsidiary of TGS, was acquired by Enverus, via its financial sponsor Blackstone, through an estimated \$115 million LBO on July 8, 2026. The company will receive a contingent payout of \$15 million upon the completion of future performance terms.
Acuitas Co	Provider of business technology consulting and enterprise software implementation services intended to serve organizations across industries. The company specializes in enterprise resource planning implementation, customer relationship management implementation, business intelligence services, cloud services, business productivity services, and other services, thereby enabling organizations to improve operational efficiency, strengthen business reporting, optimize planning, and support business growth.	
AEEC	Provider of IT, environmental, and engineering consulting services intended for federal agencies and Fortune 500 companies. The company offers digital transformation consulting, environmental remediation, compliance engineering, civil and mechanical engineering, and construction management services, enabling customers to accelerate technology modernization and achieve environmental sustainability.	
Alesco Data	Developer of a customer intelligence platform designed to improve customer acquisition through trusted consumer data and data enrichment. The company offers customer data enhancement, audience segmentation, and actionable customer intelligence, enabling marketers and customer-focused organizations to identify high-value prospects and strengthen acquisition strategies.	

Company Name	Description	Deal Synopsis
Aligned Data Centers	Operator of data centers intended to support cloud computing, artificial intelligence, and enterprise digital infrastructure. The company offers scalable data center campuses with adaptive cooling technology and flexible deployment capabilities, enabling cloud providers, enterprise organizations, and artificial intelligence operators to improve infrastructure performance, operational reliability, and expansion efficiency.	The company was acquired by BlackRock, Nvidia, Microsoft, xAI, MGX, Kuwait Investment Authority, Temasek Holdings, and Global Infrastructure Partners through a \$40 billion LBO on July 21, 2026. The transaction was supported by \$11 billion of debt financing.
arbnco	Developer of an environmental, social, and governance platform designed for large enterprises and commercial real estate. The company's platform leverages building analytics to improve the performance of commercial buildings, enabling businesses to measure, analyze, and improve energy efficiency and indoor environmental quality.	
Autosprink	Developer of fire sprinkler design software designed to streamline the design, hydraulic calculation, coordination, and material stocklisting of fire protection systems. The company's platform features intelligent modeling, integrated hydraulic calculations, clash coordination, automated stocklisting, fabrication workflows, and BIM interoperability, enabling fire protection contractors, sprinkler designers, and engineers to improve design accuracy, accelerate project delivery, and reduce installation errors.	
Barcode Supply	Provider of technical services intended to improve operational efficiency. The company offers device sourcing, device configuration, system deployment, equipment repair, technical support, and asset management, enabling organizations in the manufacturing and logistics sectors to improve accuracy and traceability across their barcode and labeling systems.	
Barich	Provider of aviation technology consulting services intended to serve airports and aviation stakeholders. The company specializes in airport information technology planning, business analysis, airport systems consulting, common use systems planning, passenger processing systems, and program and project management, thereby helping clients align technology initiatives with operational requirements and improve airport processes.	

Company Name	Description	Deal Synopsis
BizJet AI	Developer of artificial intelligence software intended to serve construction and enterprise organizations. The company's software specializes in artificial intelligence project assistance, workflow automation, estimation, scheduling, artificial intelligence agent development, and product development, thereby enabling clients to automate business processes, improve operational efficiency, and integrate artificial intelligence into their operations.	
Bluestreak	Developer of an integrated quality management and manufacturing execution system designed for service-based manufacturers. The company's technology utilizes cloud-native architecture and real-time data visibility to automate quality control tasks, enabling aerospace and automotive manufacturers to reduce audit times and manage industry-specific specifications.	
BrightTree Studios	Provider of technology design services intended to transform physical spaces into functional environments. The company utilizes 3D renderings, acoustic modeling, virtual prototyping, camera placement studies, infrastructure coordination, and wireless coverage research, enabling clients in the education and healthcare sectors to access integrated audiovisual, telecommunications, security and acoustic systems that enhance collaboration and safety.	
BST America	Provider of market data advisory services intended to optimize content acquisition and negotiation. The company offers strategic consultancy, vendor benchmarking, demand management, sourcing strategy, and contract support, enabling financial services and legal firms to optimize market data expenditures and improve commercial operations.	
Cherre	Developer of a SaaS-based financial database platform designed to collect and augment real estate data from public, private, and internal sources. The company's platform offers market evaluations and analysis, valuations, property characteristics, tax assessments, and related information, enabling clients to save on manual analytics costs and optimize strategic decision-making.	

Company Name	Description	Deal Synopsis
Cint Group	Cint Group AB is engaged in digital insights gathering of consumer insights. The software platform helps its customer segments in two ways. For its established insight company segment, it digitalizes the insights-gathering process and for the tech-enabled business segment, it provides unprecedented audience scale. The insights industry consists of three segments: Market Research, Research Software and Reporting. Geographically, the company is diversified in three segments Americas, EMEA and APAC.	The company was acquired by Triton Partners through a SEK 1.31 billion LBO on July 16, 2026.
Civira.ai	Developer of software designed for government technology automation. The company's platform provides browser-based agents that automate configuration, documentation, and scripting for civic technology systems, enabling government agencies to accelerate deployment timelines and reduce the manual effort required for system maintenance.	
Concert	Developer of a precision health payment accuracy platform designed to harmonize diagnostic evidence, policy, and payment. The company leverages proprietary laboratory market data, utilizes machine-readable clinical guidelines, provides automated claim editing, features a unique test identification system, and integrates real-time intelligence into financial workflows, enabling health plans to automate payment decisions and reduce administrative friction for genetic testing and diagnostics.	
Concord Technologies	Developer of interoperability and automation platform intended for healthcare and other document-intensive industries. The company's platform helps transfer, process, and integrate unstructured data, existing systems, and operational processes within organizations, enabling clients to deal with high volumes of documents and making it easier to integrate and store documents.	
Conversica	Developer of an artificial intelligence-powered customer engagement platform intended to automate sales, marketing, and customer communication processes. The company offers conversational artificial intelligence agents with automated email and text interactions, lead qualification, and customer follow-up capabilities, enabling sales, marketing, and customer support teams to improve response consistency and maintain customer engagement across the customer lifecycle.	

Company Name	Description	Deal Synopsis
CORE Communications	Provider of technology advisory services intended to manage and optimize network expenses. The company offers technology advisory, expense management, infrastructure consulting, network environment management, operational goal assessment, and cost-effective network solutions, enabling organizations in the real estate and non-profit sectors to gain visibility and control over their network environments.	
Credit Mountain	Developer of a personalized credit platform intended to help people access and maintain their ratings. The company's platform provides a credit counselor for financial institutions and offers a credit booster, identifying which accounts to pay off first, then automatically making extra payments to pay off debt faster, enabling customers to easily add positive payment history to their credit report and reduce debt.	
DarkVision	Developer of downhole imaging and inspection technology intended to support wellbore monitoring and asset integrity management in industrial operations. The company offers high-resolution acoustic imaging tools, real-time data visualization, and inspection software for harsh well environments, enabling energy operators and infrastructure inspection teams to assess well conditions, detect anomalies, and support maintenance planning.	
DHE Computer Systems	Provider of information technology services and technology solutions for the education, government, and corporate sectors. The company offers managed IT services, hardware procurement, device deployment, data recovery, software licensing, and technical support to assist school districts and government agencies through specialized configuration and deployment logistics.	
Dialog Health	Developer of a healthcare communication platform designed to improve patient engagement and streamline communication through secure two-way messaging. The company offers a HIPAA-compliant enterprise-grade texting platform with intelligent SMS communication and white-label deployment capabilities, enabling healthcare organizations and human resources teams to reduce missed appointments, ease administrative workload, and strengthen communication efficiency.	

Company Name	Description	Deal Synopsis
Dispatch (Boston)	Developer of service orchestration software intended to support enterprises in managing contractor networks and customer service delivery. The company builds a cloud-based platform with scheduling, routing, communication, onboarding, and analytics tools, enabling organizations to gain visibility, optimize operations, and deliver consistent customer experiences.	
Dupont Circle Solutions	Provider of salesforce consulting services intended to help organizations optimize their customer relationship management systems. The company offers advisory services, system implementations, ongoing support, system administration, team extension support, and m&a system integration, providing technology companies with simplified workflows and improved user experiences.	
Electro-Sensors	Electro-Sensors Inc manufactures and sells industrial production monitoring and process control systems. It manufactures a complete line of monitoring and control systems for a wide range of industrial machine applications. The systems measure machine production and operation rates, as well as regulate the speed of related machines in production processes. Its products include motor drive control, position monitors, sensor targets, signal conditioners, speed sensors, speed switches, tachometers, temperature sensors, vibration monitors, etc.	
Engagedly	Developer of performance management software designed to redefine performance appraisals by incorporating elements of employee engagement into the performance review process. The company specializes in developing software for manager feedback, peer praise, idea generation, objective alignment and social performance, enabling clients to operate efficiently.	
Enocta	Developer of a learning management platform designed for corporate employee development. The company provides an integrated platform that combines learning management, performance tracking, and career development within a single interface, enabling corporate organizations to manage all employee training and performance data through a centralized digital system.	

Company Name	Description	Deal Synopsis
Evo Security	Developer of an identity and access management platform designed to help managed service providers secure and manage user access across client environments. The company's platform consolidates multi-factor authentication (MFA), single sign-on (SSO), privileged access management (PAM), RADIUS authentication, help desk verification, and identity management into a unified multi-tenant environment, enabling managed service providers and managed security service providers to strengthen identity security, simplify administration, and deliver scalable managed security services to their clients.	
FastBridge Fiber	Provider of fiber-optic internet services intended for both residential and commercial customers. The company offers high-speed internet that provides uninterrupted streaming, seamless browsing, and optimal connectivity, thereby providing its customers with optimal and reliable internet.	
Genware Computer Systems	Developer of enterprise resource planning software intended to serve manufacturing, distribution, and supply chain businesses. The company's software specializes in offering enterprise resource planning, warehouse management, inventory management, production management, financial management, and other features, thereby helping clients streamline business operations, improve inventory visibility, and enhance operational efficiency.	
Greenscape Land Design	Provider of landscaping services intended for retail, hospitality, HOAs, commercial and corporate clients and public sectors. The company offers services, including landscape enhancements, snow and ice management, commercial tree care, irrigation and water management, landscape development and maintenance, thereby helping clients to maintain their properties for a long period of time by offering personalized and comprehensive services.	
GuideIT	Provider of information technology consulting services intended to serve large, small, healthcare and commercial businesses. The company offers information technology consulting, managed services, and digital transformation, enabling healthcare and commercial organizations to modernize infrastructure, integrate cloud platforms, and secure systems through ITIL-aligned service desks and proactive monitoring.	

Company Name	Description	Deal Synopsis
Highlight Technologies	Provider of federal IT services intended to solve complex challenges for government agencies in the health, citizen services, and national security sectors. The company provides DevSecOps, cloud modernization, data management, zero trust architecture, human-centered design, and hybrid cloud automation, enabling federal customers to accelerate mission delivery and improve operational efficiency through digital transformation.	
Imagine Communications	Developer of advanced broadband video processing platform intended to serve clients across the United States. The company's technology enables on-demand, interactive, and personalized television broadcasting for improved bandwidth, enhanced video quality, targeted ads, and personalized audio, thereby empowering the media broadcast, digital media, multichannel video programming distributor, and enterprise markets through transformative innovation.	
ISI Telemanagement Solutions	Developer of call analytics and queue reporting software designed to optimize communication environments. The company offers call detail record reporting, queue performance analytics and meeting analytics, providing organizations with dashboards and caller journey insights to improve customer experience and team efficiency.	
Kinzip Technologies	Provider of managed information technology and cybersecurity services intended to serve businesses and healthcare organizations. The company specializes in offering managed information technology services, cybersecurity, cloud services, information technology consulting, network and server support, and other related services, thereby helping clients maintain secure and efficiently managed technology infrastructure.	
Kopis	Provider of technology consulting and software development services intended to serve organizations. The company specializes in custom software development, mobile application development, cloud implementation, user interface and user experience design, workflow automation, and other services, thereby enabling organizations to modernize technology, streamline operations, improve business processes, and develop digital products.	

Company Name	Description	Deal Synopsis
KORE Wireless	Kore Group Holdings Inc offers IoT connectivity to the Internet (IoT Connectivity) and other IoT solutions to customers. It is a independent IoT enabler, delivering critical services to customers that allow them to deploy, manage, and scale their IoT application and use cases, globally. It provides connectivity services, location-based services, device solutions, and managed and professional services used in the development and support of IoT solutions and applications. Its IoT platform is delivered in partnership with the mobile network operator and provides secure and reliable connectivity to mobile and fixed devices. It operates in single segment and derives revenues from IoT Connectivity and IoT Solutions. Geographically it operates in United States and Other countries.	The company was acquired by Abry Partners and Searchlight through a \$726 million public-to-private LBO on July 21, 2026. The transaction values the company at an estimated \$1.25 billion. The transaction was supported by \$325 million of debt financing.
L&H Airco	Provider of building automation services intended to serve commercial, government, healthcare, education, hospitality and industrial facilities. The company specializes in building automation, temperature controls, lighting controls, energy management, engineering and other services, thereby enabling clients with improved energy efficiency, centralized building management and optimized facility performance.	
LeafHouse Financial Advisors	Developer and provider of investment technology and fiduciary services intended to support retirement plan management. The company offers automated personalized portfolios, proprietary investment grading algorithms, and enterprise-level platforms, enabling financial advisors, plan sponsors, and recordkeepers to manage investments efficiently and improve decision-making.	
LHP Telematics	Developer of a telematics platform designed to facilitate remote equipment monitoring, diagnostics, and asset management. The company offers embedded software, web-based data access, and fleet connectivity, thereby enabling heavy equipment manufacturers, dealers, rental providers, and fleet operators to oversee machine performance, streamline maintenance activities, and improve operational efficiency.	
LookingPoint	Provider of information technology services intended to serve enterprise organizations. The company specializes in information technology infrastructure, cybersecurity, cloud infrastructure, managed services, and other information technology services, thereby enabling clients to modernize their information technology environments, improve operational efficiency, strengthen security, and accelerate technology deployments.	

Company Name	Description	Deal Synopsis
Mastertech.ai	Developer of an automotive diagnostic platform designed to improve repair shop efficiency. The company's technology offers diagnostic assistance, automated estimate building, maintenance reporting, technical service bulletin indexing, wiring diagram navigation and labor guide comparison, enabling automotive technicians to perform vehicle repairs and maintenance services with increased speed and accuracy.	
Mindstep	Developer of cognitive and mental health digital therapeutics intended to lower dementia risk. The company's platform is focused on the intersection of machine learning and clinical research and builds digital solutions that put a digital clinic in every patient's pocket to decouple diagnostics and care from healthcare capacity limitations, enabling users to screen themselves for dementia and access quality dementia care.	
Moonnox	Developer of an artificial intelligence operating system designed for professional services and systems integration firms. The company's platform automates client-facing workflows through multi-turn orchestration agents grounded in organizational context, anchors execution around proprietary methodologies and historical assets, and supports analysis, sentiment tracking, and deliverable generation across projects, providing systems integrators and consulting firms with scalable operations, reduced overhead, and greater alignment between AI efforts and revenue performance.	
NASCENT Technology (Charlotte)	Developer and manufacturer of fully integrated hardware and software designed for the supply chain and the private and for-hire carrier market. The company offers reliable gate systems, terminal operating systems, mobile applications, and call boxes for gates, kiosks, and safety and security monitoring equipment in rail and marine terminals, as well as manufacturing and distribution centers, thereby enabling its clients to improve their operations, customer service, and increase their return on investment (ROI).	
New England Copy Specialists	Wholesaler of office technology and information management products intended to streamline document-centric business operations. The company offers multifunction printing devices, document digitization services, workflow integration capabilities, document management tools, and print security features, enabling businesses and enterprise organizations to improve operational efficiency, strengthen document control, and reduce manual administrative workloads.	

Company Name	Description	Deal Synopsis
Nina Protocol	Operator of a protocol platform intended to buy, sell, and stream music. The company provides a platform that hosts music for free streaming and allows the sale of digital editions while reducing platform risk and supporting value distribution, enabling users to host music for free streaming and sell digital editions.	
North Carolina Sound	Provider of systems integration services intended to provide secure entrances and communication systems. The company offers technical integrations, electronic security, communications, paging systems, telephone systems, and access control, enabling commercial and government clients to secure facilities and enhance operational connectivity.	
OneConnect (IT Consulting and Outsourcing)	Provider of technology sourcing services intended to help businesses procure and support network infrastructure. The company manages supplier implementations, multi-vendor advocacy, network spend optimization, technology goal alignment, service delivery project management, and provider network research, enabling IT departments to streamline vendor management and reduce operational costs.	
Optera (Boulder)	Developer of an enterprise carbon emissions management and reporting software designed to achieve corporate climate and sustainability goals. The company's software helps corporate emissions accounting and target achievement to scale by collecting key data and setting goals, enabling companies of any size and maturity to develop trusted, automated, and actionable data across the entire value chain.	
Payteros	Provider of enterprise payment integration services intended to accelerate the deployment of payment technologies across enterprise systems. The company offers Enterprise Resource Planning (ERP) payment integration, workflow automation, and managed deployment services, enabling fintech providers and enterprise clients to streamline payment operations and improve financial process efficiency.	
Performance Link Technologies	Provider of information transport system services intended for infrastructure connectivity. The company offers information transport system design, infrastructure installation, system maintenance, project management, engineering consulting, and network auditing, providing commercial businesses with physical network connectivity.	

Company Name	Description	Deal Synopsis
Qolo	Developer of payments infrastructure software intended to serve banks, financial technology companies and business-to-business platforms. The company's software offers an embedded ledger, virtual account management, card issuing and processing, payment orchestration, automated reconciliation, and fund tracking, thereby enabling clients to launch, manage, and scale payment programs with real-time visibility and control.	
RadiusAI (Viztel Portfolio)	Developer of a computer vision platform designed to transform existing retail camera infrastructure into actionable business intelligence. The company's platform utilizes existing camera infrastructure to generate real-time behavioral insights from anonymized data without capturing personally identifiable information or using facial recognition, providing retailers with customer journey analytics, product journey analytics, heat maps, dwell time tracking, queue analytics, and occupancy analytics to convert existing store cameras into a source of operational intelligence and monitor shopper behavior while maintaining customer privacy.	
RCS Communications	Provider of wireless communication systems intended for government, agriculture, construction, education, hospitality and other industries. The company specializes in the sales, service, rental and installation of two-way radios, dispatch consoles, in-building coverage and vehicle upfitting, enabling clients across Kentucky and Indiana to get modern, personalized services that seamlessly integrate into their operations, catering to the unique needs of their business.	
Repfabric	Developer of a sales data management and customer relationship management platform designed to improve efficiency. The company's platform offers AI-driven data processing, email and contact synchronization, mobile sales tracking, commission monitoring, and integrated reporting tools, enabling businesses to manage complex sales workflows and improve performance.	
Replify	Developer of an AI-powered virtual receptionist and sales agent designed to handle customer communications across phone, email, text, and chat around the clock. The company offers automated lead capture, personalized responses, and seamless integration with business systems, enabling fitness centers, gyms, and service-based businesses to engage customers consistently and convert inquiries into sales.	

Company Name	Description	Deal Synopsis
Robot Sales Club	Developer of a fractional sales support platform designed to help robotics and automation startups accelerate business growth. The company offers industry-specific lead generation, business development, outbound sales, and repeatable sales process development, enabling robotics and automation startups to shorten sales cycles, increase revenue, and acquire high-value customers.	
Secturion Systems	Developer of a cloud and enterprise storage encryption appliance designed to prevent data breaches. The company's appliances encrypt and communicate secure data in high-bandwidth networks and storage applications, enabling clients to protect and secure cloud-based data storage and data in transit.	
Send (Software)	Developer of a commercial insurance underwriting and policy management software platform designed to help insurers, MGAs, and reinsurers build, distribute, and manage digital insurance products. The company's platform offers configurable underwriting workflows, rating and policy administration capabilities, no-code product design tools, real-time data ingestion, and API-based integrations, enabling commercial insurance carriers and intermediaries to launch products faster, automate complex underwriting, streamline operations, and improve pricing and portfolio performance.	
Sequence (Morrisville)	Provider of engineering consulting and validation services intended for pharmaceutical, biotechnology, and life sciences companies. The company provides automation and control systems validation, commissioning and qualification, information system validation, software configuration, and project leadership, helping life sciences companies launch critical pharmaceutical projects that positively impact people's health and well-being.	
SFR Analytics	Developer of a real estate data platform designed to track all residential real estate activity and make it easier for residential seekers and companies to find actionable insights. The company platform specializes in finding active buyers, in-depth geographical analysis, viewing money lenders for loans, highest margin flippers, and bulk data licensing, thereby helping real estate companies with flexible property data solutions by pulling marketing lists to in-depth custom analytics tailored to their specific needs.	

Company Name	Description	Deal Synopsis
ShipSigma	Developer of supply chain data analytics software designed to provide shippers with assistance to reduce their transport spending and enhance savings. The company's services include parcel audit, parcel rate reduction, rate analysis, freight negotiation, freight analysis, warehouse assessment, and supply-chain analysis, and additionally provides data integration and data science powering a suite of analytics applications, enabling clients to reduce their shipping expenses and increase profits.	
Simetry	Provider of Internet of Things connectivity and managed services intended to serve businesses deploying connected devices across multiple industries. The company specializes in cellular connectivity, global data plans, device management, network security and hardware procurement, thereby helping clients deploy, secure and manage connected devices efficiently.	
Simon AI	Developer of a customer data platform intended to increase campaign performance through precise segmentation and personalization. The company's platform identifies purchase intent, predicts churn, and estimates customer lifetime value, and personalizes experiences that increase engagement and conversions, enabling brands to connect with customers through targeted campaigns and maximize marketing impact.	
SmartLink (Annapolis)	Provider of digital infrastructure services designed to support the deployment and maintenance of communication networks. The company offers infrastructure design, construction, integration, and maintenance services with nationwide delivery and localized expertise, enabling wireless carriers, wireline operators, and data center providers to build and operate reliable network infrastructure.	
SocketLabs	Developer of an email delivery and analytics platform intended for high-volume email sending, routing, monitoring, and performance optimization. The company's platform provides SMTP and API-based email delivery, real-time analytics, AI-powered reporting, configurable routing, and inbound/outbound pipeline management, enabling enterprises, SaaS providers, and large-scale senders to improve deliverability, gain visibility into email performance, and maintain greater control over email infrastructure.	

Company Name	Description	Deal Synopsis
SPT Microtechnologies USA	Manufacturer of vertical batch furnace equipment intended for the semiconductor and microelectronics industries. The company offers rapid vertical processors, atmospheric-pressure chemical vapor deposition systems, and thermal processing equipment, enabling MEMS, power device, and LED manufacturers to achieve precise wafer heat treatment and thin-film formation through advanced thermal engineering and modular system configurations.	
StackNexus	Provider of technology consulting services intended to help organizations modernize operations. The company offers technology road mapping, custom implementations, integration services, marketing automation, data warehousing, and managed services, enabling state and local government agencies to modernize constituent services and accelerate innovation.	
StorTrack	Developer of a market intelligence platform designed to provide self-storage market insights for operators, investors, and developers. The company's platform offers unit-level pricing, supply and development data, automated competitor rate tracking, real-time pricing monitoring, and historical data analysis, enabling self-storage operators to optimize revenue and pricing strategies through property-level precision.	
StreamElements	Developer of a content creation platform designed to grow the gaming audience through production, merchandising, media, and brand partnerships. The company's platform provides a powerful overlay manager and back-end tools such as chat analytics, subscriber management, stream reports, activity feed, and channel dashboard, enabling content creators to increase their revenue by enhancing their live stream capabilities and experience.	
Stride Health	Operator of an insurance recommendation platform intended to offer health insurance services. The company's platform provides access to affordable health, vision, and dental benefits and tax deduction support, enabling users to access benefits with guidance and a suite of insurance products.	
Tabnine	Developer of artificial intelligence coding software intended to improve software development workflows. The company offers AI-powered code completion, chat-based coding assistance, enterprise context integration, and private deployment options, enabling software developers and enterprise engineering teams to write, review, and maintain code with greater accuracy and consistency.	

Company Name	Description	Deal Synopsis
TeamUp	Developer of a sports team fundraising and management platform designed to strengthen team collaboration and community engagement. The company offers fundraising management, team organization, accountability tracking, community engagement tools, and leadership development features, enabling sports teams to simplify fundraising while fostering teamwork and personal development.	
TEGRIS Fire Protection	Provider of fire protection compliance software designed to automate inspection, testing, and maintenance reporting for fire authorities and property owners. The company's platform centralizes inspection records and automates compliance notifications, enabling authorities and property owners to improve regulatory compliance and corrective action tracking.	
ThrivePass	Developer of a cloud-based platform designed to foster employee well-being from onboarding to off-boarding all from single sign-on. The company's platform assists companies to manage their wellness stipends as well as provides management with spending oversight and the ability to track user preferences and health enhancements, enabling employee well-being throughout the employment lifecycle.	
TMG	Developer of a digital and audiovisual rights compliance software designed to counter the illegal downloading of music files. The company's platform offers software with a range of marketing and online communication via peer-to-peer networks and uses a technology that enforces digital and audiovisual rights, enabling clients to monitor, analyze, and enjoy online protection of live events.	
Trilogy Energy Solutions	Developer of an integrated energy software platform intended for the physical natural gas industry. The company offers cloud-native services for gas gathering, plant allocations, pipeline nominations, and producer settlements, designed to enable midstream operators and producers to unify physical and financial workflows through automated data management and api integration.	
Velocity Fiber	Provider of fiber optic network solutions designed for K-12 educational institutions. The company offers lit and dark fiber solutions via newly built aerial and underground networks, focusing on designing, building, and operating strong fiber WANs that provide scalable bandwidth for K-12 schools, enabling colleges and universities to enhance educational resources and digital learning environments.	

Company Name	Description	Deal Synopsis
Vertrax	Developer of a route management system designed to offer transportation management for long-haul fleets. The company's system includes tank monitoring, full load management service, propane route optimization and bulk commodity route optimization. among others, enabling trucking companies to optimize their fleet and operations throughout the supply chain and have full visibility.	
Visual Shop	Developer of an enterprise resource planning platform designed for process-oriented job shops. The company's technology utilizes SAP PowerBuilder and Microsoft SQL Server to provide web-native browser access, enabling metal finishing and heat treating businesses to manage complex chemical processes and access live plant data.	
Westway Enterprises	Operator of a security services company intended for government, defense, and commercial clients requiring secure facilities and information protection. The company's platform offers SCIF management, IT consulting, construction representation, project management, ICD 705 accreditation support, TEMPEST testing, secure facility management, access control, IT monitoring, secure connectivity, and classified meeting environments, enabling clients to protect sensitive information and maintain compliance with security requirements.	
Whiteboard Network	Operator of creative agency services intended to connect leadership intent with cultural impact. The company offers strategy development, brand design, website development, application building, campaign launching and storytelling through digital branding and activation studios, enabling visionary leaders to translate their intent into digital experiences.	
Wiser Solutions	Developer of a market intelligence platform designed to help businesses monitor and optimize retail performance. The company offers real-time pricing, promotions, assortment, availability, and compliance data, supported by proprietary data matching and artificial intelligence with human quality verification, enabling brands and retailers, to make informed decisions and respond efficiently to changing market conditions.	

Company Name	Description	Deal Synopsis
Workstreet	Provider of AI-powered cybersecurity and compliance services intended to serve technology companies. The company offers virtual CISO services, penetration testing, and automated compliance for SOC 2 and iso 27001, enabling startups and enterprises to manage security programs and accelerate growth through automated trust solutions.	
Xorkets FX	Developer of a digital financial trading platform designed for global investment activities. The company's platform utilizes artificial intelligence and big data analysis to provide real-time market forecasts and trade execution across foreign exchange, digital currencies, and stock indices, enabling individual and institutional clients to manage diversified investment portfolios through a high-performance infrastructure.	The company was acquired by Grupo Cibest, Banco de Chile, The Goldman Sachs Group and JP Morgan Asset Management through an estimated \$2.26 billion LBO on July 27, 2026.
Zephyr Associates	Developer of investment analytics intended to support financial advisors, asset managers, and investment professionals. The company offers portfolio analysis software, performance and risk analysis, asset allocation analysis, style attribution, manager research, reporting tools, financial databases, and portfolio analytics, thereby helping clients evaluate investment portfolios and support investment decision-making.
