The company offers dental implant surgery, wisdom tooth removal, bone grafting, and corrective jaw surgery, enabling patients to restore dental function and facial structure through advanced surgical techniques and specialized anesthesia services.	
Delorean AI	Developer of predictive artificial intelligence solutions intended for the healthcare and consumer goods industries. The company's platform utilizes machine learning algorithms and biologically validated data mining to forecast disease progression and business events, enabling healthcare providers and corporations to implement proactive treatments and optimize commercial operations.	
DermCare Management	Operator of a dermatology practice management company designed for and by seasoned dermatology professionals. The company is engaged in merging seasoned medical professionals with clinically focused management expertise and also offers dermatology care, surgery, and clinical services, enabling clients with the administrative support they need for continued success.	
DialysisPPO	Provider of cost-containment services intended for group health plans. The company offers dialysis charges management, esrd cost containment, Medicare coordination services, appeal defense services, stop-loss laser reduction and plan document modification, enabling self-funded plan sponsors to reduce dialysis claim liability through patented plan language and capture Medicare coordination savings without waiting for the standard coordination period.	

Company Name	Description	Deal Synopsis
FEI Systems	Provider of innovative health information technology services intended to assist federal, state and local health and human services agencies. The company's platform specializes in healthcare services, from comprehensive long-term services and supports (LTSS) and behavioral health case management to support services for federal agencies working at home and abroad, thereby helping clients manage incident reporting, data analysis, claims and invoices.	
Health Dimensions Group (Wisconsin Portfolio)	Operator of senior living communities is intended to provide personalized care and operational oversight for older adults. The company utilizes a proprietary management process focused on quality, people, financial performance, and marketing, providing assisted living, memory care, independent living, skilled nursing, post-acute consulting, and interim leadership, enabling senior care providers to optimize operations and improve resident outcomes.	
HealthCorum	Operator of a health data analytics company intended to provide insights into healthcare provider performance and cost efficiency. The company offers a cloud-based platform that analyzes healthcare data to generate provider quality scores and comparative insights, enabling healthcare payers and risk-bearing organizations to identify efficient providers and manage healthcare costs.	
Ingenyx	Manufacturer of medical device components intended to serve original equipment manufacturers in the healthcare industry. The company specializes in diagnostic and interventional catheters, balloon catheter systems, medical extrusions and micro-diameter tubing, sheath and dilator sets, medical wire, and sutures and bioabsorbable materials, thereby enabling clients with contract development and manufacturing capabilities for medical devices.	The company, a subsidiary of Teleflex, was acquired by Kohlberg & Company and Montagu Private Equity through a \$1.5 billion LBO on August 3, 2026.
Innovative Health	Manufacturer of reprocessed single-use cardiology medical devices intended to reduce the cost of cardiac procedures. The company offers reprocessed electrophysiology and cardiology devices through a targeted reprocessing program, enabling hospitals and cardiac care facilities to reduce medical device expenditure while maintaining access to necessary procedural equipment.	

Company Name	Description	Deal Synopsis
KREWE Anesthesia	Provider of anesthesia staffing services intended to connect healthcare facilities with qualified clinicians. The company offers prn shifts, temporary staffing, permanent placement, managed services, transition assistance, and functional optimization, enabling healthcare facilities to maintain consistent care delivery and operational stability through a nationwide network of vetted anesthesia providers.	
Lofta	Provider of at-home sleep apnea testing and treatment services intended for individuals with sleep-disordered breathing. The company offers home sleep tests, telemedicine consultations, and CPAP equipment, enabling patients to obtain a diagnosis and manage therapy through a streamlined seven-day process and remote monitoring technology.	
Long 80	Provider of information technology and security services based in Princeton, New Jersey. The company offers AI-driven information technology operations (AIOps) and security operations, which include cybersecurity and other services; it also offers managed services, virtual desktops, clinical application services, and cloud enablement, all intended for healthcare organizations across the United States.	
Med-Lake Laboratory	Provider of clinical laboratory services intended to provide diagnostic information for healthcare decision-making. The company offers clinical toxicology, blood chemistry, clinical chemistry, infectious disease testing, reference laboratory services, and diagnostic testing, providing physician practices and skilled nursing facilities with high-complexity clinical data to improve patient outcomes.	
Mercury Medical	Manufacturer of medical equipment intended to improve patient outcomes in critical care environments. The company offers specialized airway management and resuscitation technology featuring integrated tidal volume markings, built-in manometers, integrated nebulizer systems, video intubation technology, pressure monitoring and filtration systems, enabling acute care providers to enhance patient safety during emergency procedures.	
Midwest Dental Arts	Manufacturer of dental restorations intended to serve dental professionals. The company's technology utilizes computer-aided design, three-dimensional printing, titanium and zirconia milling, denture injection systems, and digital impression scanning, enabling dentists to receive custom-fit crowns, bridges, and implant prosthetics.	

Company Name	Description	Deal Synopsis
Mitchell-Vance Laboratories	Manufacturer of over-the-counter scar treatment products based in Guilford, United States. The company specializes in the research, development, and marketing of skincare products used for the prevention of scars through a silicone application.	
Monticciolo Family and Sedation Dentistry	Operator of a dental group with 11 locations in Florida, providing sedation dentistry, general dentistry, and dentistry from the heart. The entity's experienced doctors offer a range of dental services, including crowns, bridges, dentures, and teeth whitening. They accept self-pay patients and offer an in-house discount program, with appointment scheduling available online or by phone.	
Monticciolo Family and Sedation Dentistry (Portfolio of Nine Practices across Tampa Bay Region)	A portfolio of nine dental practice assets across the Tampa Bay region of Florida.	
Multi-Pak Packaging	Provider of contract packaging services intended to support the healthcare and consumer products industries. The company offers solid dose bottling, cold-form blistering, pouching and sachets, medical device kitting, secondary cartoning, and probiotic packaging, enabling healthcare brands to bring products to market through climate-controlled facilities and integrated supply chain solutions.	
MYOS (Biotechnology)	Producer of muscle health supplements intended for humans and animals. The company offers nutritional supplements backed by clinical research and proprietary formulations, providing consumers and pet owners with products that support muscle mass maintenance and overall physical health.	
NovaBone	Manufacturer of synthetic bone graft products intended for developing biomaterials that harness the body's natural healing process. The company's products include bioactive glass bone graft devices, orthopedic products, and apoptosis regulators for the medical community, thereby helping customers with a complete line of osteobiologics products for their needs.	The company, a subsidiary of Halma, was acquired by Isto Biologics, via its financial sponsors Golub Capital BDC, Golub Capital BDC 4, Golub Capital Private Credit Fund BDC, and Keensight Capital, through a \$60 million LBO on August 4, 2026 for an undisclosed date.
Octex	Manufacturer of technically complex plastic parts designed for markets. The company utilizes a data-driven scientific injection molding methodology and an in-house metrology branch to optimize manufacturing processes in real-time, enabling medical and electronics firms to receive high-precision components with minimal variability and zero defects.	

Company Name	Description	Deal Synopsis
Pixel Health	Provider of technology consulting and managed services intended for the healthcare industry. The company utilizes a human-centered design approach to assess, implement, and manage technology infrastructure, including network virtualization and hyperconverged architecture, enabling health systems to optimize clinical workflows, improve patient engagement, and enhance overall operational efficiency.	
Profitable Ppos	Provider of insurance optimization services intended to support dental practices. The company specializes in PPO fee negotiation, credentialing, and network analysis using specialized knowledge of third-party administrators and shared networks, enabling dentists to increase profitability and reduce administrative burdens through strategic insurance participation management.	
Pure Stride	Manufacturer of orthotic footwear and foot-support products intended to provide comfort and support. The company offers podiatrist-designed orthotics, therapeutic flip-flops, slides, and foot pads with arch support, cushioning, and pressure-relief features, enabling individuals experiencing foot and heel conditions to enhance mobility and maintain everyday comfort.	
Rael	Manufacturer of organic feminine care products intended to offer natural and effective items for everyday personal care needs. The company's products include chemical-free cotton pads, panty liners, feminine wash, and natural face sheet masks made from botanical ingredients and exotic fruits, enabling women to have healthy alternatives to conventional feminine care products.	The company entered into a definitive agreement to be acquired by TowerBrook Capital Partners and other investors through a \$290 million LBO on August 26, 2026.
RedHill Biopharma (Global Talicia Business)	Manufacturer of a branded gastrointestinal medication intended to treat Helicobacter pylori infections. The company offers a fixed-dose triple-therapy combination of omeprazole magnesium, amoxicillin, and rifabutin through a resistance-mitigating oral capsule, enabling gastroenterologists and adult patients to achieve higher eradication rates for bacterial stomach infections.	The company was acquired by Apotex, via its financial sponsor SK Capital Partners, through a \$53 million LBO on August 31, 2026. The company will receive a contingent payout of \$35 million based on worldwide net sales milestones.
Relevate Health Group	Provider of omnichannel marketing and data analytics services intended to drive engagement with healthcare providers and improve clinical decisions. The company offers proprietary data analytics, machine learning-driven multichannel marketing, medical video games for behavior change, electronic health record targeting, key opinion leader content, access and health system strategies, providing pharmaceutical and biotechnology companies with personalized outreach to improve brand engagement.	

Company Name	Description	Deal Synopsis
Sage Product Development	Provider of medical device product development and manufacturing services. The company offers mechanical engineering, bioengineering, and industrial design services for surgical devices and implants, providing medical technology firms with project management and low to mid volume contract manufacturing to facilitate market launch.	
Saratoga Dermatology	Provider of dermatological services intended to help patients manage skin health and aesthetic concerns. The company offers medical, cosmetic, and surgical dermatology services, providing skin cancer screenings, acne treatments, and facial rejuvenation procedures, enabling patients to access specialized care for various skin conditions and cosmetic goals.	
Sero Solutions	Developer of surgical vendor coordination software designed for healthcare organizations managing surgical cases and equipment workflows. The company provides a web-based platform integrated with a system that supports vendor scheduling, case tracking, automated communications, loaner tray management, equipment check-in and check-out, mobile access, and compliance tracking, improving coordination and visibility across the surgical process.	
Sriven Labs	Provider of cannabis and hemp testing services intended for regulatory compliance and consumer safety. The company offers compliance testing, research and development testing, environmental monitoring, stability studies, formulation support and potency analysis, providing cannabis cultivators with centralized access to multistate testing data and real-time trending tools.	
Summit Dermatology	Provider of dermatologic services intended to treat skin conditions in patients of all ages. The company utilizes digital photography for lesion localization, electronic medical records for patient communication, and clinical trial participation for psoriasis treatments, providing skin cancer screenings, mohs micrographic surgery, botox treatments, wart removal, mole removal, and cyst removal to enable patients to receive specialized medical and surgical care for various skin health concerns.	

Company Name	Description	Deal Synopsis
Thermo Fisher Scientific (Microbiology business)	Provider of microbiology diagnostic services intended to serve the clinical, pharmaceutical, and food safety sectors. The company offers diagnostic consumables, antimicrobial testing equipment, culture media, pharmaceutical testing tools, food safety diagnostics and clinical diagnostic kits, thereby enabling laboratories to perform antimicrobial susceptibility testing and safeguard public health through consistent quality control.	The microbiology business of Thermo Fisher Scientific was acquired by Astorg through a \$1.08 billion LBO on August 12, 2026.
Village Medical Michigan	Operator of primary care practices intended to provide coordinated and accessible healthcare services. The company operates a network of practices, including locations within retail pharmacies, that utilize a team-based model to manage annual check-ups, illness treatment, and injury care through in-clinic, virtual, and in-home visits, providing primary care, chronic care, and preventive medicine to focus on both treatment and long-term wellness.	
Vitruvias Therapeutics	Operator of a generic pharmaceutical company intended to develop complex APIs and finished dosage forms that are inherently difficult to manufacture. The company manufactures technically difficult generic products and overcomes the manufacturing complexities and raw material sourcing challenges by utilizing strategic partnerships in order to increase the availability of vital generic drugs.	
Yellow Emperor	Manufacturer of liquid dietary supplements intended to support wellness and personal care brands. The company offers custom liquid manufacturing, proprietary herbal blending, reverse engineering, flexible batch production, turnkey bottling, and shelf-ready formulation, enabling dietary supplement and personal care brands to scale production through certified organic and sustainable manufacturing processes.
