## Information Technology Deals for August 2026

| Company Name                                            | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | Deal Synopsis |
|---------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| 360Globalnet                                            | Developer of a no-code digital claims platform designed to automate and orchestrate the end-to-end insurance claims lifecycle. The company's platform offers configurable workflow automation, supply chain orchestration, unstructured data extraction and analysis, digital communication tools for all claim participants, and integrated claims service capabilities, enabling insurance providers to manage claims processes efficiently while improving customer experience and operational control.                                              |               |
| Analytica Consulting                                    | Provider of Information Technology (IT) consulting services intended to help organizations leverage data to improve decision-making and operational performance. The company specializes in providing data services including visualization, analytics, governance, database, and data modeling design and offers architecture, application development, strategy, and training services on multiple platforms including tableau, qlik, Microsoft and Splunk, enabling organizations to make data-driven decisions and improve operational performance. |               |
| Arkansas Valley Communications                          | Provider of communication services intended to enable instant connectivity and situational awareness for safety and productivity. The company provides manufacturer-certified technical support and lifecycle services for wide-area communication networks, enabling security teams to coordinate response across multiple zones and properties.                                                                                                                                                                                                       |               |
| Artium Technologies (Software Development Applications) | Provider of software development services intended to build and deploy enterprise-grade agents. The company utilizes forward-deployed engineers, continuous alignment techniques and agentic software engineering methods to automate code generation, providing enterprises with secure agents that deliver measurable return on investment.                                                                                                                                                                                                           |               |
| AskTuring                                               | Developer of an AI-powered platform designed to access and analyze proprietary data and automate complex processes. The company offers a secure, private, customized smart data warehouse to unlock insights within their specific industry vertical while meeting the required compliance for their industry, AI agents help find documents to automate repetitive tasks, enabling businesses to access information and data efficiently across multiple platforms by using artificial intelligence.                                                   |               |

| Company Name                              | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                         | Deal Synopsis |
|-------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| Astralis (Business/Productivity Software) | Developer of Salesforce consulting and customer relationship management software designed for high-tech, manufacturing, and life sciences organizations. The company's platform offers automated workflows, real-time data synchronization, modular dashboards, sales cloud configuration, and API integrations, enabling businesses to manage sales, marketing, and customer support activities within a centralized cloud environment.                            |               |
| Attilius Technologies                     | Developer of a proprietary intelligence platform designed for national security applications. The company offers data intelligence solutions, analytic software, and end-to-end intelligence services, enabling the intelligence community and the Department of War to detect and respond to evolving threats through vertically integrated data collection and deployment.                                                                                        |               |
| AuditMate                                 | Developer of elevator auditing software designed to offer elevator maintenance management services and make elevator contract decisions simple. The company offers auditing, maintenance management, equipment inspection, maintenance contracts, modernization contracts, contract analysis, maintenance completion reporting, callback and repair management, and compliance management, enabling property managers to generate more revenue from their business. |               |
| Aven International                        | Manufacturer of precision tools designed for optical inspection and assembly applications. The company offers microscopes, video inspection systems, digital cameras, lenses, illuminated magnifiers, and assembly tools, providing industrial manufacturing clients with equipment to perform detailed component analysis and technical assembly tasks.                                                                                                            |               |
| Biblionix                                 | Developer of cloud-based library automation and management software designed to streamline library operations and patron services. The company offers tools for event and room scheduling, acquisitions management, inter-library resource sharing, and two-way messaging with patrons, enabling clients to manage collections, coordinate services, and improve access to information through integrated digital library systems.                                  |               |

| Company Name                            | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | Deal Synopsis |
|-----------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| Boston Industries                       | Distributor of refurbished laboratory equipment designed for scientific research and analysis. The company operates a service facility to inspect, repair and test pre-owned scientific instruments, providing universities and hospitals with a diverse inventory of liquid handlers, microscopes and analyzers that meet functional standards while adhering to budgetary constraints.                                                                                                                                                                             |               |
| Bridge (Business/Productivity Software) | Developer of an online training platform designed to provide sport-specific training programs. The company's platform offers tools for coaches, trainers, physical therapists, and athletes to create, deliver, and track performance programs, enabling athletes to receive customized programs based on the events they participate in and reach their peak performance.                                                                                                                                                                                           |               |
| CAI LLumin                              | Developer of computerized maintenance management software designed to improve asset reliability, reduce downtime, and streamline maintenance operations. The company's platform combines cloud-based computerized maintenance management, enterprise asset management, machine-level sensor data, predictive maintenance, automated work orders, asset tracking, and compliance management, enabling manufacturers, utilities, municipalities, and other asset-intensive organizations to improve equipment uptime, accelerate repairs, and extend asset lifecycles. |               |
| CaliberMind                             | Developer of a b2b marketing intelligence platform intended to provide deep customer journey insights and attribution modeling. The company's platform unifies marketing, sales, and revenue operations data, enabling enterprise revenue teams to measure marketing effectiveness, optimize lead generation, and identify high-impact channels through AI-driven attribution and account-based analytics.                                                                                                                                                           |               |
| ChannelBound                            | Provider of data and compliance services intended for insurance brokers and business advisors. The company's services utilize systems integration, data cleaning, data warehousing, workflow automation, and technical advisement, enabling business advisors to manage regulatory reporting requirements and consolidate information from disparate legacy systems.                                                                                                                                                                                                 |               |

| Company Name                | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Deal Synopsis |
|-----------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| CipherIP                    | Developer of technology licensing software intended to protect sensitive data. The company offers technology licensing, software commercialization, technical evaluation, deployment planning, commercial coordination and market introduction, enabling financial institutions and government agencies to implement quantum-proof cryptographic protection across enterprise systems and embedded devices.                                                                                                                                    |               |
| CloudX ()                   | Provider of software development services intended to help businesses transform technologically. The company specializes in website design, cloud computing, AI (artificial intelligence) development, product enhancement, big data analytics, automation expansion, digital archaeology, machine learning, and other related services, enabling clients to reduce overhead and promote agility, migrate mission-critical applications, accelerate delivery times, and detect issues in the early phases of the software development process. |               |
| CoastTec                    | Provider of uninterruptible power supply reconditioning services intended to extend the life of power backup equipment. The company offers factory-certified refurbishment, repair, and recycling for uninterruptible power supply units, enabling business enterprises to maintain equipment fleets through advanced-exchange options, comprehensive protection plans, and technical recalibration that ensures units meet original engineering specifications.                                                                               |               |
| Command Access Technologies | Manufacturer of electrified door hardware designed for secure access control. The company offers electrified cylindrical locks, motorized mortise locks, exit devices, power supplies, energy transfer hinges, and support components, providing commercial facilities with integrated hardware for security and power management.                                                                                                                                                                                                             |               |
| Connected Energy            | Developer of grid management software designed for electric utilities. The company offers distributed energy resource management software, demand management platforms, grid management tools, data analytics software, and load control hardware, providing utilities with grid-edge orchestration that enables the management of distributed energy resources and the maintenance of grid reliability.                                                                                                                                       |               |

| Company Name        | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Deal Synopsis |
|---------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| CPA QualityPro      | Developer of a license management software designed to simplify registration and mobility compliance for accounting firms. The company's platform utilizes a custom determination engine to automate license renewals and compliance tracking across multiple jurisdictions, enabling accounting firms to reduce manual process risks and ensure regulatory adherence.                                                                                                                                         |               |
| Craig Wire Products | Manufacturer of magnet wire designed for motor, transformer and stator coil winding repairs. The company's manufacturing capability includes drawing, rolling, annealing, covering and enameling, providing electromagnetic wire repairs through quick manufacturing turnarounds and low minimum order quantities.                                                                                                                                                                                             |               |
| Creative Force      | Developer of a production and workflow management platform designed to streamline workflows. The company's platform offers sample management, post-production management, and automation that frees up creatives to focus on their actual work, which can lead to increased productivity and efficiency, enabling clients to increase speed to the web, increase studio productivity, reduce onboarding time for new team members, and accelerate growth to meet the needs of the modern e-commerce landscape. |               |
| Cumulus Consulting  | Provider of technology consulting and digital transformation services intended for the manufacturing sector. The company offers ERP software selection, implementation, and optimization alongside custom development, machine integration, and data dashboard creation, enabling manufacturers to streamline operations and achieve real-time visibility across their business processes.                                                                                                                     |               |
| Delorean AI         | Developer of predictive artificial intelligence solutions intended for the healthcare and consumer goods industries. The company's platform utilizes machine learning algorithms and biologically validated data mining to forecast disease progression and business events, enabling healthcare providers and corporations to implement proactive treatments and optimize commercial operations.                                                                                                              |               |
| DoControl           | Developer of a security platform designed to protect SaaS data and identities. The company provides automated data access control, monitoring, orchestration, and remediation tools for SaaS applications, enabling clients to manage data exposure, prevent data exfiltration, and govern access across cloud collaboration environments.                                                                                                                                                                     |               |

| Company Name                                  | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Deal Synopsis                                                                                                                                                                                                                            |

The company offers services such as security monitoring, cloud management, cybersecurity, IT consulting, network integration and other related services, enabling engineering, insurance, manufacturing, accounting, legal and other industries to receive proactive maintenance and risk prevention to enhance operational security and system uptime. |                                                                                                                                                                   |
| MAC Of All Trades                                                                          | Retailer of refurbished Apple products intended to provide affordable computing solutions. The company offers refurbished macbooks, imacs, ipads, and iphones through a certified testing and refurbishment process, enabling retail consumers and educational institutions to purchase operational hardware at lower prices while providing a buyback platform for used electronics.                                                                                       |                                                                                                                                                                   |
| MoboHubb                                                                                   | Developer of a cloud-based mobile application intended to simplify the deskless workforce. The company's application provides the deskless workforce with an app to document what they do, when they do it, and GPS for where they do it, enabling users to perform more effectively and immediately boost the value of their work.                                                                                                                                         |                                                                                                                                                                   |
| NetWolves                                                                                  | Provider of managed network services intended to proactive network management and security protection. The company offers infrastructure management, security reporting and carrier-agnostic connectivity through a proprietary monitoring device and self-service portal, enabling enterprise businesses to detect potential threats and access real-time network health data.                                                                                             | The company, a subsidiary of Vaso, was acquired by Coeo Solutions, via its financial sponsor Riata Capital Group, through a \$14.5 million LBO on August 3, 2026. |
| OptionMetrics                                                                              | Developer of historical options data and analytics products platform designed for institutional investors, risk managers, and academic researchers. The company offers products to construct and test investment strategies, perform empirical research, and assess risk, enabling portfolio managers, traders, and quantitative researchers to make informed, improved, and profitable investment decisions.                                                               |                                                                                                                                                                   |
| Orangeburg Fiber (A Portfolio of Fiber-Optic Network Assets in Orangeburg, South Carolina) | A portfolio of fiber-optic network assets in Orangeburg, South Carolina.                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                   |

| Company Name                                      | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Deal Synopsis |
|---------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| PingCx                                            | Developer of an autonomous commissioning platform designed to optimize building automation systems. The company's technology provides automated testing and validation for building systems throughout their lifecycle, enabling building owners and service providers to reduce energy waste, cut emissions, and ensure peak operational performance.                                                                                                                             |               |
| PlexTrac                                          | Developer of cybersecurity reporting and exposure management software designed for security teams, consultants, and enterprises. The company provides a platform for penetration testing reporting, vulnerability tracking, remediation workflow management, and collaboration between security stakeholders, thereby helping organizations manage findings and monitor risk more efficiently.                                                                                     |               |
| Power Info                                        | Developer of power system modeling software designed to address business needs in the electric power industry. The company specializes in common information model-based model exchange and external network modeling, provides data-driven grid visualization tools for exploratory analysis of large power grids, and develops visual big data analytical tools, enabling clients to enhance the quality and update frequency of external network models for electric utilities. |               |
| PricePatent (Intellectual Property (IP) Business) | Provider of integrated intellectual property and research development platform services intended for technology-driven organizations. The company offers patent management software, research discovery tools, technology valuation, and commercialization consulting, enabling researchers and enterprises to unify the innovation lifecycle from initial development to global market entry through specialized AI agents and extensive patent databases.                        |               |
| Prospectus                                        | Developer of an outplacement platform designed to provide career transition support and labor market intelligence. The company's platform utilizes live labor market data to generate demand-validated career pathways and real-time return-on-investment dashboards, enabling enterprise employers to facilitate faster employee placement while protecting brand reputation.                                                                                                     |               |

| Company Name                          | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | Deal Synopsis |
|---------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| Quality Insights                      | Developer of a food quality management platform designed to improve quality oversight, sourcing decisions, and freshness management across food supply chains. The company offers inspection data capture, analytics dashboards, supplier performance tracking, shelf-life monitoring, quality scorecards, and automated communications, enabling food retailers, wholesalers, buyers, category managers, and quality control teams to maintain consistent inspection standards, strengthen supplier evaluation, and proactively manage product quality and freshness. |               |
| Revv (Business/Productivity Software) | Developer of an AI-powered ADAS calibration identification software designed to offer automotive repair diagnostics services. The company's platform utilizes AI to help mechanics and service technicians quickly diagnose hard-to-identify issues with a car's advanced driver assistance systems (ADAS), enabling car manufacturers to boost shop revenue and ensure safety for drivers.                                                                                                                                                                            |               |
| Selectron Technologies                | Developer of a relay enterprise platform designed for voice, web, and mobile technology. The company's platform offers features like data and payment security, customized messaging, delinquent accounts information, and other related features, enabling clients to access their platform to send automated, pre-crafted communications by phone, fax, email, or text message.                                                                                                                                                                                      |               |
| Sero Solutions                        | Developer of surgical vendor coordination software designed for healthcare organizations managing surgical cases and equipment workflows. The company provides a web-based platform integrated with a system that supports vendor scheduling, case tracking, automated communications, loaner tray management, equipment check-in and check-out, mobile access, and compliance tracking, improving coordination and visibility across the surgical process.                                                                                                            |               |
| Silverstrand Technologies             | Provider of security and technology installation services intended to serve commercial, residential, and government sectors. The company utilizes specialized security cameras equipped with advanced software to assess movement, provides twenty-four-hour remote monitoring services, and offers a unique combination of sophisticated equipment and technical knowledge, enabling clients to protect commercial and residential properties through integrated surveillance and alarm systems that provide real-time alerts and law enforcement coordination.       |               |

| Company Name                              | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Deal Synopsis |

| Tenica Global Solutions                      | Provider of national security and cybersecurity services intended to serve government and commercial organizations. The company offers cybersecurity, information technology, professional services, logistics management, supply chain management, and crisis response services, enabling clients to secure national defense and intelligence operations through specialized engineering and integrated technology solutions.                                                                                                                            |               |
| Ternion Corporation                          | Developer of simulation software designed to create custom simulations for government and commercial organizations. The company's technology develops commercial off-the-shelf and custom simulations using a flexible framework that enables interfaces across live, virtual, and constructive environments, providing aerospace and defense clients with solutions for command and control training, mission planning, and systems engineering.                                                                                                         |               |
| The Mobility House (North American Business) | Developer of a smart charging and energy management platform designed to enable reliable and efficient charging of electric vehicle fleets. The company's technology platform offers a smart charging system, energy management software, a local load controller, a remote management dashboard, fleet electrification consulting, and turnkey charging solutions, enabling electric vehicle fleets to optimize charging to reduce peak grid loads and energy costs.                                                                                     |               |
| TradeRunner Technologies                     | Developer of an artificial intelligence-powered recruitment platform designed to connect HVAC and plumbing contractors with skilled technicians. The company utilizes a proprietary talent database powered by artificial intelligence for instant candidate discovery, employs a specialized matching algorithm to rank technician suitability, and automates initial candidate outreach and personalized follow-ups, enabling clients to instantly identify and shortlist HVAC and plumbing technicians who meet specific skill and geography criteria. |               |
| Truk TMS                                     | Provider of logistics and freight management services intended to serve the Pacific Northwest and customers nationwide. The company offers a wide range of services, such as less-than-truckload LTL shipping, truckload, oversize, expedited, supply chain management and other related services, enabling customers to make the entire process of creating new shipments simple and convenient.                                                                                                                                                         |               |

| Company Name | Description                                                                                                                                                                                                                                                                                                                                                                                                                                           | Deal Synopsis                                                                                                                                                                        |

| U.S. Cost    | Provider of construction estimating, cost management, and value engineering services intended to support project phases from planning through construction. The company utilizes 5D technology and proprietary software to deliver project controls, enabling owners and contractors to manage budgets, schedules, and risks throughout the capital planning, pre-construction, and construction phases.                                              |                                                                                                                                                                                      |
| UnionTrack   | Developer of a cloud-based management platform intended for labor unions. The company's software integrates member engagement, dues processing, and grievance tracking into a single application, enabling union leadership to streamline day-to-day operations and strengthen communications with their membership.                                                                                                                                  |                                                                                                                                                                                      |
| Urban Emu    | Provider of user experience design and technology services intended to simplify complex information. The company offers software engineering, strategic communications, and accessibility compliance through a purpose-centered design approach, enabling federal agencies and private enterprises to transform business operations and engage audiences through intuitive digital experiences.                                                       |                                                                                                                                                                                      |
| VideoVerse   | Developer of a video technology platform committed to empowering both enterprise and individual content creators with disruptive, scalable technology. The company's AI-driven platform incorporates machine learning technology to analyze live content and generate real-time video highlights, capturing key moments, thereby enabling its users to get an ecosystem of smart video editing tools using AI (artificial intelligence) conveniently. |                                                                                                                                                                                      |
| ViewLift     | Developer of a video streaming platform intended to offer entertainment contents. The company's platform broadcasts multi-lingual movies and TV programs and offers a variety of features, including video monetization, analytics, and distribution, enabling creators and brands to build successful businesses around their content.                                                                                                               | The company was acquired by DAZN, via its financial sponsor SURJ Sports Investments, Aser Ventures and Access Industries, through an estimated \$100 million LBO on August 19, 2026. |
| Visix        | Developer of digital signage solutions intended for corporate, hotels, educational, healthcare, government and athletic facilities. The company designs, develops and supports a suite of browser-based digital signage products, enabling to allow users to create, manage and schedule organizational communications from anywhere and to deliver messages, media and alerts to virtually any endpoint.                                             |                                                                                                                                                                                      |

| Company Name       | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Deal Synopsis |
|--------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| VisualAIM          | Developer of an industrial asset management platform designed to unify mechanical integrity and inspection workflows. The company's technology converts engineering drawings into interactive documents and automates asset register generation, enabling chemical and energy producers to manage fixed equipment reliability through cloud-based risk analysis, field data capture, and three-dimensional facility navigation.                                 |               |
| Vital Installs     | Provider of structured cabling and technology installation services intended for commercial and government sectors. The company offers network design, fiber optic installation, access control integration, and AI-powered video surveillance, enabling businesses to access reliable communication infrastructure and integrated security services for smarter facility management.                                                                           |               |
| VitreK             | Manufacturer of safety and electrical test equipment intended for the semiconductor, aerospace and defense industries. The company offers hipot testers, power analyzers, high-speed digitizers and turbine engine balancing systems, providing customers with precision measurement tools to facilitate research, testing and compliance conformance.                                                                                                          |               |
| Wave Wireless      | Provider of internet services intended to deliver secure and reliable connectivity. The company utilizes fiber-to-the-premises and fixed wireless technologies to provide high-speed internet, residential packages, business packages, fiber internet, fixed wireless internet, and broadband services, enabling residential and commercial users to access secure and always-on connectivity in rural and urban areas.                                        |               |
| Wayside Publishing | Developer and publisher of teaching and learning products designed for the evolving classroom. The company provides digital learning platforms, online textbooks and authentic native speaker materials while incorporating diversity and inclusion rubrics, interculturality focus and social emotional learning integration, enabling teachers to customize lesson plans and manage student progress through integrated digital and print language curricula. |               |

| Company Name                                     | Description                                                                                                                                                                                                                                                                                                                                                                                                                           | Deal Synopsis |
|--------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| Xamin                                            | Provider of managed it services intended to serve organizations in regulated and high reputational risk industries. The company offers managed it, cybersecurity, cloud, consulting, advisory, and data protection services by utilizing a soc 2 type 2 certified framework and a consultative approach, enabling financial and healthcare institutions to maintain regulatory compliance and secure their technology infrastructure. |               |
| ZeroTouch (Electronic Equipment and Instruments) | Manufacturer of metrology platforms designed for high-speed, non-contact inspection of complex geometry parts. The company's technology utilizes laser scanning, micron-level point cloud generation, in-line automated inspection, and digital twin creation, enabling automotive, aerospace, and medical device manufacturers to perform rapid dimensional quality control and defect detection without physical contact.           |               |
