

Energy Deals for September 2026

There were 12 completed U.S. private equity deals in the Energy sector during the month of September. The number of deal transactions decreased 47.8% when compared to August's deal count. There was a 55.6% decline in the number of Energy deals compared to September 2025.

Energy Deals for September 2026

Company Name	Description	Deal Synopsis
Blackwell Electric (Other Commercial Services)	Provider of electrical and automation services intended for the commercial, industrial, and oilfield sectors. The company offers electrical installation, control panel fabrication, and PLC troubleshooting, enabling oil and gas operators to maintain efficient and safe production environments through certified technical expertise and in-house manufacturing capabilities.	
Castleton Commodities International (Roseton Generating Facility in Newburgh, New York)	1,242-megawatt dual-fuel natural gas-fired power plant in Newburgh, New York. The asset supplies electricity to NYISO Zone G and comprises existing power generation infrastructure and transmission interconnections, providing reliable electric generation with potential for future redevelopment into a multi-use energy campus incorporating new generation and battery energy storage systems.	
CHAMPS	Provider of substation engineering services intended to support utility power delivery infrastructure. The company offers substation engineering, electrical design, engineering studies, project management, construction management, and quality assurance, enabling utilities to modernize power systems through a structured five-stage quality control process that covers conceptual planning, technical design, and construction support for high-voltage infrastructure.	
Encore Gas & Supply	Distributor of industrial gases designed for operational continuity. The company offers industrial gases, welding machines, safety equipment, power tools, equipment repair, and gas system design, providing the metal fabrication and manufacturing sectors with mission-critical supplies and technical maintenance.	
Millennial Energy Partners (Non-Operated Drillco Working Interests)	The Asset is located in the United States.	
Montco Onfield Solutions	Provider of mobile power generation services intended to support the energy production value chain and industrial projects. The company utilizes parallel-able diesel generators, remote start/stop functionality, full telemetry monitoring, GPS tracking, and in-house refurbishment capabilities, providing diesel generators, distribution panels, transformers, equipment rentals, and maintenance plans, enabling energy and construction companies to access reliable and customizable power solutions.	

Company Name	Description	Deal Synopsis
New Tech Global	Provider of upstream operations consulting services intended to support energy sector projects. The company offers drilling and completions oversight, project and asset management, technical advisory services, contract operations, and environmental consulting, enabling energy firms to manage field operations and technical personnel requirements.	
Omega Air Refueling Services	Provider of air-to-air refueling services intended to transfer aviation fuel from one aircraft to another aircraft. The company offers aerial refueling along with probe and drogue or boom aerial refueling support to help aircraft stay in flight longer and extend their range, thereby enabling to achieve missions without being slowed by traditional refueling processes on the ground.	
Plains LPG Services (Bumstead Liquefied Petroleum Gas Storage Facility in Phoenix, Arizona)	A bumstead liquefied petroleum gas storage facility based in Phoenix, Arizona.	
Rossee Oil	Distributor of petroleum products intended for commercial and industrial customers. The company offers lubricants, diesel fuel, gasoline, diesel exhaust fluid, hydraulic hoses and ancillary petroleum products, enabling businesses to manage fleet fueling and industrial operations through bulk storage facilities and cardlock systems.	
Toklan Oil And Gas	Operator of oil and gas field properties intended for energy resource extraction and transportation. The company operates producing wells and gathering systems within the Western Anadarko basin, providing oil production, gas production, gathering systems, well operations, field services and asset administration, enabling the energy sector to access and transport energy resources through managed upstream and midstream assets.	The company was acquired by Vega Upstream JV, via its financial sponsor ADM Energy, through a \$15 million LBO on September 16, 2026 for an undisclosed amount.
Uplight	Developer of energy management software intended to serve utility companies representing residential, commercial and industrial end-users in North America. The company offers a comprehensive customer-centric technology suite and critical energy expertise, connecting energy customers to the decarbonization goals of power providers and helping customers save energy and lower costs, thus creating a more sustainable future for all.
