

Information Technology Deals for September 2026

There were 92 completed U.S. private equity deals in the Information Technology sector during the month of September. The number of deal transactions increased 7.0% when compared to August's deal count. There was a 24.0% decline in the number of Information Technology deals compared to September 2025.

Information Technology Deals for September 2026

Company Name	Description	Deal Synopsis
10x People	Developer of cloud-based numbering software intended to streamline telecommunications operations. The company offers local number portability, inventory management, and telephone number ordering services through a software-as-a-service platform, enabling carriers and service providers to automate porting processes and optimize their numbering ecosystems.	
Adamson & Co	Provider of accounting services intended to turn complex financial data into confident business decisions. The company utilizes a team-based approach and specialized information technology systems to provide tax preparation, auditing services, business consulting, estate planning, bookkeeping, and payroll services, enabling middle-market businesses and nonprofit organizations to achieve financial clarity and regulatory compliance.	
Aidin	Developer of a healthcare referral management platform designed to coordinate patient care transitions and reduce avoidable hospital days. The company's platform provides real-time visibility into at-risk transitions, automated referral workflows, and integrated provider communication, enabling hospitals and health systems to improve patient outcomes and increase staff efficiency through streamlined care coordination.	
AireSpring	Provider of managed telecommunications and network services intended to serve enterprise and mid market organizations. The company offers dedicated internet access, SD-WAN, MPLS, cloud communications, IP services and managed connectivity services, thereby supporting reliable and scalable business connectivity.	
Alaris (Business/Productivity Software)	Developer of a cloud-based management platform designed to streamline check-in experiences. The company offers check-in management software, member experience platforms, youth club management tools, reservation systems, daily activity tracking, and emergency contact management, enabling health clubs to improve operations.	

Company Name	Description	Deal Synopsis
Amivero	Provider of IT professional services and technology services intended for federal government and national security agencies. The company offers AI and automation implementation, cloud migration, data engineering, DevSecOps software development, fraud and intelligence operations, and digital identity management, enabling federal agencies to modernize legacy systems, optimize workflows, and detect security threats.	
AppWrap	Provider of erp software services intended to maximize the efficiency and functionality of business systems. The company offers netsuite managed services, integrations, and implementations, providing erp optimization and automated financial reporting to enable technology and healthcare businesses to manage accounting processes and focus on growth.	
Apriva ISS	Developer of secure classified mobility and communications products designed to protect sensitive voice and data traffic carried over commercial networks. The company offers secure gateway and virtual private network products, device management and monitoring software, and authentication software for credentialed access on ruggedized field hardware, enabling federal law enforcement and defense agencies to access classified networks from field locations over cellular, Wi-Fi, or satellite connections.	
Atlantic Training	Provider of online training software designed to address workplace safety and compliance needs. The company's platform provides a cloud-based learning management system, environmental health and safety management software, micro-learning modules, interactive webinars and live-action training videos, enabling businesses to manage workforce development and maintain regulatory compliance.	
Atrium (IT Consulting and Outsourcing)	Provider of IT consulting services intended to help companies navigate business transformation by establishing IT systems of intelligence augmented with artificial intelligence and analytics. The company combines industry expertise, leading cloud platforms and data science to deliver transformative outcomes, it takes a data-driven approach by fusing together industry and process expertise across the disciplines of math, programming and consulting, thereby helping its customers maximize the power of their data to solve their important challenges.	

Company Name	Description	Deal Synopsis
Avertium	Provider of cybersecurity and compliance services intended to serve mid-market and enterprise organizations. The company offers managed security, compliance consulting, threat protection, risk assessment, security architecture design, and incident response, enabling clients to enhance cyber maturity and safeguard systems against evolving threats.	
BanaTech Consulting	Provider of technology advisory services intended to help organizations procure and optimize technology environments. The company utilizes a buyer-first methodology and reverse rfp framework to define business context and architectural requirements, enabling enterprise and mid-market organizations to align technology investments with strategic objectives and operational results.	
Benny the Benefits Navigator	Developer of a digital benefits platform intended to simplify and personalize employee benefits management. The company's platform offers a centralized, user-friendly interface for managing diverse employee benefits, including health, wellness, and financial perks, enabling customers to easily access, understand, and optimize their benefit packages with AI-powered personalized recommendations.	
Blue Dot	Developer of a tax compliance platform designed to automate employee-driven transactions. The company's platform offers AI-powered VAT recovery, taxable employee benefits analysis, and expense auditing, enabling enterprise organizations to maximize tax reclamation and ensure global regulatory compliance.	
Bluefin Clinical	Developer of clinical supply forecasting software designed to optimize trial execution. The company's platform offers clinical supply forecasting, supply planning software, pack and label planning, automated shipment planning, in-app reporting, and business intelligence tools, enabling pharmaceutical companies to automate manual workflows and reduce operational risk.	
BlueSquIDX	Developer of an acquisition and sourcing platform intended to serve real estate investors. The company's platform allows investors to buy or invest in houses, along with services such as automatically generating contracts, comparing nearby houses, and tracking and managing all offers and transactions, helping investors to invest in real estate.	

Company Name	Description	Deal Synopsis
Bonfy.AI	Developer of an artificial intelligence data security platform designed to protect unstructured content. The company's platform utilizes adaptive knowledge graphs and entity-aware controls to provide real-time visibility, risk detection, and preventive enforcement across human- and machine-driven workflows, enabling organizations to scale automated systems safely.	
BotDojo	Developer of an enterprise-grade artificial intelligence enablement platform designed to design, deploy, and scale intelligent agents. The company offers a low-code visual workflow builder, a library of templates, a neurosymbolic guardrail system, human-in-the-loop feedback queues, and tool orchestration capabilities, enabling enterprise organizations to automate complex business workflows and manage autonomous agents across multiple communication channels.	
Bucs Analytics	Developer of a data integration platform designed for financial planning and analysis solutions. The company consolidates data from all internal sources and provides real-time analytical insights to help clients make strategic investment decisions, thereby helping private equity firms, growth-oriented businesses, and advisors to make strategic organizational investment decisions.	
Callaway Cloud Consulting	Provider of technology consulting services intended for global enterprise companies. The company offers Salesforce strategy, platform stabilization, custom AI services, cloud spend audits, DevOps services, data engineering projects, platform architecture, crm migration services, technical advisory, and managed IT services, enabling clients to maximize cloud investments.	
Canopy Software	Developer of a cloud-based application designed for data breach analysis. The company's software applies artificial intelligence (AI) and machine learning to combat the data privacy risks that come with the digital world, enabling law firms, legal service providers and incident response teams to quickly notify individuals when their identifying information may be at risk following a breach.	

Company Name	Description	Deal Synopsis
CAUSE + EFFECT Strategy	Provider of business intelligence services intended to assist organizations in realizing the full potential of data for optimization and growth. The company specializes in offering data visualization and aggregation, data science, strategy development and data measurement and optimization services, thereby helping clients democratize data through data science.	
CHEERS (Business/Productivity Software)	Operator of an online verification platform designed to facilitate building energy code compliance. The company offers project registration, compliance verification, document management, field forms, and Energy Star certification, enabling building professionals and contractors to document and verify compliance with California energy code regulations through a centralized digital registry.	
Clarity AI	Developer of a sustainability technology platform designed to deliver environmental and social insights. The company's platform uses machine learning and big data to contribute to socially efficient capital allocation by providing decision-makers with the tools to understand the capabilities of sustainability analysis related to investing, corporate research, benchmarking, consumer e-commerce, and regulatory reporting, enabling investors to assess the sustainability of all societal stakeholders.	
Command Alkon	Developer and distributor of software and hardware products intended for construction material producers. The company offers software for the automation of batching, dispatching, mix design, production and quality control, fleet tracking and back-office operations, enabling business partners to automate inter-enterprise operations, capture real-time visibility into heavy material orders and deliveries, leverage leading-edge software experiences to achieve mutually beneficial goals and share knowledge to manage by exception and promote certainty of outcomes.	The company was acquired by Francisco Partners through an estimated \$715 million LBO on September 30, 2026. The transaction values the company at \$1.3 billion. As a result of the transaction, the company was recapitalized.
Dayforward	Operator of a life insurance platform intended to bring financial security to families across America. The company's platform offers personalized policies that guarantee continued income to the beneficiaries if the policyholder passes away, enabling individuals to purchase the right insurance for their families online.	

Company Name	Description	Deal Synopsis
Debticate	Developer of debt capital markets software intended to streamline the loan origination process. The company offers three tailored platforms, to automate and streamline the debt origination, trading, and servicing processes, enabling customers to improve efficiency, reduce costs, and mitigate risks in the debt capital markets.	
Delmhorst Instrument	Manufacturer of moisture meters designed for identifying leaks and monitoring moisture levels in building materials. The company offers moisture meters, thermo-hygrometers, electrodes, contact pins, moisture content standards, and plastic sleeves, enabling building inspectors and restoration experts to perform accurate moisture measurements and environmental monitoring.	
Dickson	Manufacturer of environmental monitoring and compliance instruments intended for highly-regulated industries. The company offers temperature data loggers, humidity chart recorders, and cloud-based monitoring software, enabling healthcare and pharmaceutical firms to protect sensitive assets and maintain regulatory compliance through continuous data acquisition and accredited calibration.	
Ditek Corp	Manufacturer of surge protection devices designed for safeguarding electrical and electronic systems. The company offers modular surge protectors, industrial surge protectors, whole-home surge protectors, AC power protection, network surge protectors, and fire alarm surge protectors, providing commercial and industrial markets with protection against voltage spikes to prevent equipment damage.	
EasyLlama	Developer of a compliance training platform designed to train client organizations and prevent harassment at work. The company operates an online training platform to offer up-to-date courses around sexual harassment prevention, diversity and inclusion, and more, thereby helping client organizations to create a safe and positive workplace.	

Company Name	Description	Deal Synopsis
eMCP	Developer of maintenance control software designed for vertical transportation systems. The company's technology utilizes maintenance control programming, real-time monitoring, QR code integration, mobile application development, compliance auditing, data synchronization, and automated reporting, providing EMCP software, maintenance control programs, maintenance completion reports, equipment survey tools, maintenance monitoring services, and an EMCP mobile app to enable elevator contractors and building owners to manage their equipment maintenance through transparent and code-compliant digital platforms.	
EmpowerID	Developer of identity management and cloud security systems intended to serve enterprise and hybrid environments. The company provides single sign-on, multi-factor authentication, identity lifecycle management, access governance, and privileged access control features, thereby enabling organizations to enforce security policies and manage user access across cloud and on-premises infrastructure.	
Encompass Technologies	Developer of a cloud-based distribution ERP software designed for beverage and food industry suppliers. The company's software contains functions that are required to fit business needs like route accounting, warehouse management, sales execution, warehouse automation, fleet management, asset management and more, thereby enabling clients with all-in-one software to increase operational efficiency and manage growth effectively.	
Firebrand Technologies	Developer of software and services designed to help publishers achieve success. The company's offering includes title management enterprise software, Eloquence On Demand, Eloquence On Alert, eloquence on alert and other related services, helping book publishers and distributors manage their internal workflows, digital distribution, marketing efforts, and the distribution of their title metadata for more sales and profit.	The company, a subsidiary of Media Do International, was acquired by Valsoft Corporation, via its financial sponsors Coatue Management, Propelr Growth, Viking Global Investors, Portage and Power Corporation of Canada. through a \$20 million LBO on September 30, 2026.
Fluvio Marketing	Provider of product marketing consulting services intended to help high-growth companies turn their most critical, strategic go-to-market challenges and build sustainable growth. The company provides extensive B2B and B2C product marketing expertise on-demand for software and technology companies such as workshops, consulting, hiring, and more, thereby helping clients find product-market fit, establish go-to-market strategies, and deliver high-impact campaigns.	

Company Name	Description	Deal Synopsis
Fortress SRM	Provider of co-managed cybersecurity and risk management services intended to reduce cyber risk and strengthen organizations' security capabilities. The company's cybersecurity services combine assessments, risk and gap assessments, managed detection and response, and log monitoring, endpoint security, email protection, threat intelligence, and incident response preparedness, enabling internal IT teams to strengthen cyber resilience while retaining control of their security operations.	
Forvis Mazar (IT and Cyber Managed Services Practice)	Provider of managed IT and cybersecurity services intended for middle-market organizations. The company offers IT operations support, managed backup, managed SIEM, managed brand protection, managed incident response, business application management, end-user training, privacy program development, HIPAA compliance assessments, and AI regulatory compliance assessments, enabling clients to scale operations.	
GeoSync Microwave	Manufacturer of radio frequency and microwave products built for satellite communications. The company offers up converters, down converters, frequency synthesizers, low noise amplifiers, amplifier systems, custom satellite communication products, providing commercial and military sectors with hardware for communication challenges.	
GoSaaS	Developer of SaaS products intended to focus on cloud migrations, applications, implementations and training. The company offers a wide range of services including product design development, commercialization and supply chain, quality management, sales and service management and tech manufacturing services, enabling clients to get the services and products as per their needs	
Immix Software	Developer of security monitoring software designed to improve management and response to security events. The company offers central station software, guard force software, a mobile application, an artificial intelligence link, an integration ecosystem, security management platform, enabling commercial monitoring stations to manage diverse security technologies through a single intuitive workflow.	

Company Name	Description	Deal Synopsis
Innofin Solutions	Provider of IT consulting and financial management services intended for enterprise businesses and corporate finance departments. The company offers Oracle EPM implementations, financial planning and forecasting, financial consolidation and close, profitability modeling, enterprise data management, and administrator support, enabling organizations to streamline financial reporting and align strategic budgets through specialized Oracle software solutions.	
Intelligent Waves	Provider of systems integration services intended to enable secure information sharing for defense and intelligence communities. The company utilizes patented Internet Protocol spread-spectrum technology to randomize and distribute message packets through simultaneous multiple transport paths and encrypted channels, providing federal agencies with cybersecurity engineering, enterprise network engineering, cloud computing services, intelligence analytics, software development, and cognitive human performance training.	
Iris OnWatch	Developer of an identity and cyber protection platform intended to provide security solutions for businesses and their customers. The company's platform offers identity monitoring, automated personal data removal, scam detection tools, and dark web data breach searching, enabling enterprise clients to provide their customers with comprehensive protection against identity fraud and cyber threats.	
ITC Digital Solutions	Provider of government technology and consulting services intended to serve federal agencies in the United States. The company offers a range of services, including information technology modernization, cloud computing and hybrid infrastructure, data and artificial intelligence, digital mission platforms, emerging technologies, and professional consulting and transformation services	
Keep Aware	Developer of an enterprise browser security platform designed for protecting sensitive work in the browser. The company's platform offers phishing protection, credential theft prevention, social engineering defense, cybersecurity awareness training, data leakage prevention, and zero-day threat defense, enabling enterprise clients to secure sensitive work activities within the web browser against advanced cyber threats.s	

Company Name	Description	Deal Synopsis
LSA Portfolio Analytics	Provider of outsourced chief investment officer services intended to support independent financial advisors. The company offers investment research, portfolio analytics, manager due diligence, risk-adjusted modeling, downside protection resources, and customized presentation materials, enabling financial professionals to optimize client portfolios while reducing time spent on back-office management.	
Luna Innovations	Luna Innovations Inc is engaged in optical technology, providing high-performance fiber optic test, measurement, and control products for the telecommunications, and photonics industries, and distributed fiber optic sensing solutions that measure and monitor materials and structures for applications in aerospace, automotive, oil, and gas, security, and infrastructure. Its Lightwave segment develops, manufactures, and markets optical measurements technologies like Sensing including short, medium, and long-range distributed fiber optic sensing solutions and Terahertz measurement products, and Communications test and photonic control including test equipment for communications devices and networks and specialty laser and photonic components. It derives a majority of its revenue from the U.S.	The company was acquired by TJC (New York) through a \$48.2 million public-to-private LBO on September 18, 2026.
M7 Health	Developer of a workforce management platform designed to offer shift scheduling to nurses. The company's platform provides staffing technology with a systematic way to automate scheduling and access to real-time staffing metrics and insights, enabling healthcare professionals to match shifts and career opportunities that align with their personal needs and professional goals.	
Martiancraft	Provider of software development services intended to improve business efficiency and user engagement. The company offers software development, ux design, design systems, prototyping, launch strategy, and staff augmentation, providing enterprise companies with end-to-end technical support to build and maintain native mobile and desktop applications.	
Morris Electronics	Provider of managed IT services and network support intended for businesses. The company offers network design, cybersecurity prevention, and hardware repair services, enabling clients to maintain secure and reliable technology infrastructure through on-site and remote technical assistance.	

Company Name	Description	Deal Synopsis
Nerds Support	Provider of managed IT services intended to offer convenient and reliable services to business owners. The company's services include on-demand computer repair, network, cloud, colocation, managed IT and consulting as well as cloud infrastructure designing, enabling businesses to achieve desired business outcomes quickly and cost efficiently with technology.	
Newport Systems	Provider of comprehensive software and technology services intended to leverage the power of information to provide solutions for the transportation and intermodal industry. The company delivers custom web-based equipment and repair management solutions with particular expertise in facilitating maintenance & repair activities as well as terminal and depot gate management that are strategic, scalable, easy to use and deliver real financial benefits through enhanced visibility, process connectivity and operational efficiencies, enabling clients to meet their unique business needs by streamlining their processes with a powerful end-to-end solution.	
Numecent	Developer of a cloud technology and application container management platform designed to simplify the mobilization of Windows applications. The company abstracts applications from underlying operating systems, fragments software into instruction pages, utilizes a virtual memory management unit for on-demand delivery, containerizes applications within virtual sandboxes, automates software license policy enforcement, and facilitates real-time application rollbacks, enabling enterprise organizations to package and deploy complex Windows applications across physical and virtual endpoints.	
NuWave Technology Partners	Provider of IT solutions intended to offer simple, secure, and reliable solutions to meet all organizational needs, along with technology plans and budgets that align with the organization's goals. The company designs, implements, and supports data center/cloud solutions, networks, PCs, servers, voice over IP telephone systems, and more.	
Open Automation Software	Developer of an industrial automation platform designed for data connectivity and visualization. The company offers a universal data connector, data historian, alarm notification, web HMI, trend visualization and IoT gateways, built for manufacturing and industrial environments to connect and move data between industrial devices and enterprise systems.	

Company Name	Description	Deal Synopsis
Open Measures	Developer of a social intelligence platform designed to investigate harmful online activity. The company offers a research dashboard, public api, datasets, command-line interface, Jupyter notebook, and custom crawl requests, enabling journalists and researchers to trace networks of influence across social media platforms to identify extremism and disinformation.	
Orgvue	Operator of an organizational design and planning software platform intended for human resources, finance, and business sectors. The company's platform enables businesses to capture, manage, and use data to analyze and transform their operations by bringing together organizational data held across different systems, enabling enterprises to understand, design, and deliver more effective and efficient operating models.	
Overlayy	Developer of an artificial intelligence-powered sales insights platform designed to streamline deal research and sales workflows. The company's platform captures data across customer relationship management systems, communications and product usage to generate meeting briefs, analyze historical deal patterns and draft follow-up notes, enabling sales teams to reduce preparation time and manage sales opportunities efficiently.	
Pathfynder	Provider of advanced cybersecurity services intended to identify vulnerabilities and enhance digital defenses for organizations facing evolving cyber threats. The company leverages a team of veteran cybersecurity experts who utilize the latest technologies and techniques to assess risks, address unique security challenges, and deliver both offensive and defensive solutions, enabling enterprises and small to medium-sized businesses across diverse industries to strengthen their security posture and protect critical assets.	
Performance Cabling Technologies	Provider of fiber optic, communications, and access control infrastructure services intended for commercial, municipal, utility, and university customers. The company offers structured cabling, fiber optic installation, directional drilling, splicing, conduit systems, and maintenance services, thereby helping customers build and maintain reliable communications infrastructure.	

Company Name	Description	Deal Synopsis
Polaris Aero	Developer of an aviation safety intelligence platform designed to offer real-time flight risk assessment and safety analysis for the aviation industry. The company's software hosts various applications including one that automatically identifies hazards and provides risk mitigation, and another that serves as an organizational safety management system, enabling aviation organizations to access critical real-time insights that can be used for fine tuning the day-to-day operations.	
PowerComm Solutions	Manufacturer of communication and test equipment for the electric utility industry. The company's platform offers power line carrier analyzers, monitors, and hybrids, along with technical training and calibration services, enabling utility professionals to maintain and diagnose system protection communication paths with specialized diagnostic tools and field-ready instrumentation.	
Prism Electric	Provider of electrical contractor services intended to keep commercial and industrial facilities powered and connected. The company offers building information modeling, virtual design, project prefabrication, low-voltage technology, emergency response, and facility coordination, enabling the healthcare and commercial markets to maintain critical operations through rapid diagnostic and repair services.	
QSR Automations	Developer of restaurant operations management software designed to drive customer experiences and manage profitability. The company's platform provides inventory management, labor scheduling, kitchen display systems, operations execution, learning management, and operational intelligence, enabling multi-unit restaurant brands to automate sales forecasting and optimize staffing levels.	
Recovery Point System	Provider of IT infrastructure and business resilience services intended to support all technology environments, from the mainframe to the desktop. The company offers cloud-based business resilience services and serves commercial organizations, as well as Federal, state and local governments, enabling to deliver a comprehensive suite of IT resiliency and disaster recovery solutions for heterogeneous environments.	

Company Name	Description	Deal Synopsis
Relish	Developer of enterprise applications designed for consumer goods, energy, financial, healthcare and public sector. The company offers features such as automated supplier data validation, anti-fraud checks, payment accuracy, invoice automation, platform integration, invoice price tracking and verification and more, enabling businesses to simplify the complex and bridge enterprise data systems and maximize their investment.	
RevTrak	Developer of a payment processing platform designed to process district payments, childcare fees, and food service payments. The company's platform provides payment processing, administrative software, event ticketing, childcare management, community education enrollment, and financial reporting tools, enabling K-12 school districts to automate financial reconciliation and centralize fee collection.	
rockITdata	Provider of IT consulting services intended to provide data-driven insights and system upgrades for improved decision-making and operational efficiency. The company offers decision engineering, artificial intelligence, machine learning, cloud integration, systems integration, and data engineering, enabling government and commercial clients to convert raw data into actionable insights for strategic planning and modernize legacy systems to increase organizational agility.	
ROI Engineering	Provider of control systems integration and industrial automation services intended for the food and beverage, chemical, and manufacturing industries. The company offers PLC programming, SCADA and HMI development, database integration, network design, electrical layout drawing creation, and 24/7 technical support, enabling manufacturers to automate production lines, improve operational consistency, and ensure product quality.	
Sability	Provider of human capital management consulting services intended to optimize workforce technology ecosystems. The company offers hcm consulting, wfm implementation, managed payroll services, strategic guidance, system optimization, and post-live support, enabling organizations to improve workforce performance and streamline payroll processes through specialized platform expertise.	

Company Name	Description	Deal Synopsis
Scalinx	Manufacturer of mixed-signal semiconductor products designed for wideband signal processing. The company's integrated circuits utilize proprietary smart conversion core technology for power-efficient analog-to-digital and digital-to-analog conversion, enabling defense and communications firms to implement high-performance data conversion and digital processing in electronic systems.	The company was acquired by NanoXplore, via its financial sponsor Bpifrance, through a EUR 30,000 LBO on September 2, 2026. The acquisition will also enable the creation of a larger European design house, capable of pooling investments, running several complex programs, and offering a competitive alternative to non-European players.
Smartling	Developer of cloud-based enterprise translation software designed to offer a gateway to accelerate growth in international markets. The company's enterprise translation software features the ability to translate and deploy multilingual websites and dynamic web applications, mobile applications, and business documents across corporate digital infrastructure, enabling businesses to localize content across devices and platforms.	The company was acquired by Vitruvian Partners through a \$195 million LBO on September 15, 2026. The transaction was supported by \$195 million of debt financing.
SOR Controls Group	Manufacturer of industrial process instrumentation and grab sampling systems designed to serve nuclear power generation, oil and gas, power generation, chemical producers, and waste and wastewater industries. The company offers a wide range of products including probes, sensor assemblies, pressure switches, pressure flushing rings, pressure transmitters, magnetic level indicators, and more.	
Southeastern Cable Contractors	Provider of broadband construction services intended for telecommunications and utility sectors. The company offers broadband infrastructure, fiber-optic networks, coaxial builds, MDU installations, ISP installations, utility construction, permitting services, easement acquisition, project management, and inventory management, enabling network providers to connect communities.	
Spree Finance	Developer of loyalty infrastructure software designed to enable programmable rewards and instant merchant redemption. The company offers a stablecoin-backed rewards layer, on-chain payment rails, programmable reward conditions, a budget recycling mechanism, and white-label marketplace deployments, enabling web3 protocols and consumer brands to provide users with instant access to a global merchant network for reward redemption.	

Company Name	Description	Deal Synopsis
Square 9 Softworks	Developer of a document management platform designed to capture, extract, and classify information, transforming it into usable intelligence. The company's platform captures business content into high-value information that can be shared across organization, secures and complaints storage of business content enforces business rules while allowing for global participation and extends document automation with Web forms that eliminate paper-based processes, enabling clients to store, extract and share their important data to other employees with the help of various document management products that provides reliable and prompt services.	
STACK Cybersecurity	Provider of managed IT and cybersecurity services intended for small and midsize businesses. The company offers managed IT support, cybersecurity services, compliance guidance, risk assessments, technology planning, help desk support, backup management, and network administration, enabling clients to reduce downtime and manage digital risks.	
Steampunk	Provider of information technology consulting services intended for federal government agencies. The company offers software engineering, cloud migration, cybersecurity services, digital platform services, data exploitation, and application development, enabling federal clients to modernize systems and accelerate the delivery of secure digital platforms through a human-centered design approach and agile delivery frameworks.	The company was acquired by Veritas Capital Fund Management through a \$435 million LBO on September 18, 2026.
Surveillance Systems	Provider of surveillance system integration and electronic security services intended for gaming, commercial, healthcare, government, retail, and educational sectors. The company offers IP video network design, CCTV installation, access control systems, video analytics, point-of-sale data mining integration, and surveillance room design, enabling organizations to secure facilities, mitigate risk, prevent theft, and maintain regulatory compliance.	
SweepWX	Developer of a weather intelligence platform designed to provide real-time storm analysis and severe weather detection. The company's platform utilizes artificial intelligence and live NEXRAD radar data to identify storm rotation and atmospheric changes, enabling organizations in the aviation, defense, and energy sectors to access early warnings and precise weather observations for operational safety.	

Company Name	Description	Deal Synopsis
Symphony Talent	Developer of a recruitment marketing technology platform intended to automate talent acquisition tasks and empower candidate interactions. The company's technology unifies customer relationship management, career site design, and programmatic advertising, providing talent acquisition teams with integrated employer branding, creative services, and data analytics to optimize the hiring funnel from attraction to retention.	
Tactacam	Manufacturer of outdoor camera technology intended to serve scouting and security applications. The company offers cellular trail cameras, cellular security cameras, smart bird feeders, camera mounts, solar panels, and lithium battery packs, designed for hunters and homeowners to access real-time wildlife images and property monitoring without wi-fi.	The company was acquired by GTCR through an estimated \$1 billion LBO on September 28, 2026.
Tanda	Developer of a cloud-based workforce management software designed for rostering, attendance, labor insights, and workforce success. The company's platform helps users to build a roster, track employees, automate timesheets, and pay staff through its application which is available on Android as well as iOS, enabling employers to automate and reduce manual data entry for employees.	
TBAR Partners	Provider of storefront management services intended to scale e-commerce brands. The company offers storefront management, affiliate marketing, performance advertising, creator content production, creator community management, and storefront scaling, providing e-commerce brands with creator-led content and performance advertising to scale operations.	
Teachally	Developer of an artificial intelligence platform designed to support lesson planning and student success. The company's platform generates standards-aligned lessons, assessments and differentiated instructional materials, providing educators with automated tools to improve classroom efficiency and manage student learning needs.	
TPM (Manufacturing Division)	Operator of the Manufacturing Division based in South Carolina, United States.	

Company Name	Description	Deal Synopsis
Trafix	Provider of broker-neutral technology services intended to supply cutting-edge, innovative trading services that address the functional and regulatory requirements of the Financial Services Industry. The company's technology utilizes recent advancements in software development and enterprise architecture to resolve the growing challenges faced by today's trading community, enabling clients to access customized financial software and applications to meet their demands for customer satisfaction.	
Uplight	Developer of energy management software intended to serve utility companies representing residential, commercial and industrial end-users in North America. The company offers a comprehensive customer-centric technology suite and critical energy expertise, connecting energy customers to the decarbonization goals of power providers and helping customers save energy and lower costs, thus creating a more sustainable future for all.	
VivoAquatics	Developer of aquatic management software designed for water safety and compliance. The company's technology provides real-time monitoring, digital logging, automated reporting, dosing calculations, remote oversight and water conservation tracking, enabling hospitality and fitness organizations to maintain regulatory standards and reduce operating costs.	
Wilson Controls	Manufacturer of automation and control panels designed for the water and wastewater sectors. The company provides programmable logic controller hardware, relay logic, supervisory control and data acquisition software, instrumentation integration, certified panel fabrication, automated Excel reporting, alarm monitoring software, and system troubleshooting, providing municipal and industrial customers with precise equipment monitoring and process regulation.	
Yellow Dog Software	Developer of inventory management software designed to manage inventory and back-office operations for hospitality and retail businesses. The company's software provides automated inventory tracking, real-time reporting, and multi-vendor integration, enabling hospitality and retail businesses to reduce waste and improve operational efficiency.
