Energy Deals for October 2026

There were 20 completed U.S. private equity deals in the Energy sector during the month of October. The number of deal transactions increased 25% when compared to September's deal count. There was a 16.7% decline in the number of Energy deals compared to October 2025.

Energy Deals for October 2026

Company Name	Description	Deal Synopsis
Accelergen Energy	Developer of renewable power generation and energy storage projects intended to accelerate the transition to zero-carbon-emission electricity. The company utilizes a proprietary analytics platform to forecast grid conditions, commercial performance, and development risk to identify optimal substations and project sites, providing utilities and corporate buyers with utility-scale battery energy storage systems and hybrid solar storage systems to meet evolving grid demands and achieve sustainability goals.	
Affordable Gas	Provider of propane delivery and appliance services intended for residential, commercial, and agricultural sectors. The company offers propane fuel, cylinder exchange, tank rentals, gas piping, appliance repair, and water heater installation, providing homeowners and businesses in South Florida with energy solutions and maintenance support.	
Aucoin Telecom & Utility Construction	Provider of infrastructure construction and maintenance services intended for the telecommunications and power industries. The company offers aerial and underground construction, fiber splicing, cell site builds, transmission tower maintenance, and generator installations, enabling utility operators and telecom providers to build and repair critical infrastructure across regional markets.	
Bold Renewables	Provider of solar inverter services intended to focus on fields generating utility power. The company offers a variety of aftermarket parts services which include monitoring, break-fix, preventative maintenance and training and technical services, enabling clients to meet their solar inverter needs.	
Cleartrace Technologies	Developer of energy and carbon accounting technology designed to accelerate and scale renewable production without massive subsidies. The company's technology implements digital infrastructure to create accurate and verifiable energy emissions data, enabling corporations, real estate owners, and renewable energy suppliers to achieve their sustainability and financial goals.	

Company Name	Description	Deal Synopsis
Creedence Energy Services	Provider of production and midstream chemical services intended for the oil and gas industry. The company offers customized chemical programs, acidizing, stimulation treatments, scale remediation, and technical laboratory services, enabling energy producers to optimize well performance, reduce freshwater injection volumes, and protect infrastructure assets through proprietary-formulated chemistries and advanced analytical solutions.	
Filtration & Hose Specialties	Provider of industrial and oilfield supplies intended for the energy and manufacturing sectors. The company offers hydraulic hose assemblies, industrial hose assemblies, filtration products, pipe fittings, valves, and V-belts, designed to support oilfield operations and industrial maintenance through regional distribution and emergency technical support.	
Georgia Renewable Power	Operator of a renewable energy company designed for the generation of baseload electricity. The company utilizes biomass combustion, steam turbine generation, combined heat and power, emission control, fuel handling systems, and wholesale power transmission, enabling utility companies to source renewable power from organic waste materials.	
Kingfisher Solar	Provider of solar installation and project management services intended for residential and commercial clients. The company offers residential solar installation, commercial solar solutions, solar project management, energy discovery sessions, labor and material warranties, and site preparation support, enabling homeowners and businesses to transition to clean energy through customized array designs and managed concierge services.	
MorningSky Power (1 Gigawatt of Utility-Scale Clean Energy Projects in the United States)	A portfolio of 1 gigawatt of utility-scale clean energy projects located across the United States.	
OneEnergy Renewables (Two Solar Projects in Washington)	A portfolio of two solar projects with a combined total of 15.79 megawatts (MW) located in Washington, United States.	
Otovo (Mr. Elektro and PV Hawaii)	Provider of solar energy and electrical installation services intended to serve residential and commercial customers in Hawaii and Norway. The companies specialize in photovoltaic system maintenance, diagnostics, repairs, solar panel cleaning, electrical work, electric vehicle charger installation, solar panel system installation, smart home and energy management and other services, thereby helping customers maintain, install and manage solar energy and electrical systems.	The companies are in talks to be acquired by Otovo, via its financial sponsors Encompass Capital Advisors and Swiss Life Asset Management, through an estimated $4.6 million LBO as of August 27, 2026. The acquisition is part of a multi-assets transaction that includes two businesses, PV Hawaii and Mr. Elektro, with a $4.6 million round amount of those, Mr. Elektro is valued at NOK 30 million, and PV Hawaii is valued at USD 0.75 million, with earnouts of up to NOK 10 million and USD 0.81 million, respectively.

Company Name	Description	Deal Synopsis
Polymer Technologies	Provider of polymer gel services intended to increase hydrocarbon recovery and reduce operating costs. The company's systems utilize hydrophilic bonding chemistry, polyacrylamide injection, cross-linker gelation, reservoir drainage modification, thief zone blocking, annular gel systems, clay stabilization, and wettability improvement, enabling oil and gas operators to access water shutoff treatments, conformance control, vertical profile modification, casing leak repair, annular gel systems, and injectivity improvement.	
Precision Profiles	Manufacturer of high-precision metal components intended to serve the power generation and defense industries. The company offers turbine vanes, turbine blades, shroud and band material, forging rings, locking tabs, spacers, and hollow machined components, enabling original equipment manufacturers to reduce turbine build costs and increase production capacity through shortened lead times and proprietary machining processes.	
Realize 2050	Operator of energy transition consultancy and innovation company intended to serve utilities, large companies, and well-funded startups. The company offers a list of services, including utility innovation strategy and execution, AI and technology investment prioritization, go-to-market commercial strategy development, techno-economic analysis, business model innovation frameworks, energy tech spinout and venture launch support, and more.	
Rialto Bioenergy Facility	Operator of a resource recovery facility intended to stop methane emissions from landfills by diverting food waste and converting it to renewable fuel. The company specializes in processing a combination of food waste extracted from municipal waste streams, liquid waste and municipal biosolids to convert it into a carbon-negative renewable natural gas (RNG), thereby helping its clients to achieve comparatively a cleaner, greener planet effectively.	
St. Landry Solar	A 150-megawatt solar energy project based in Wilmington, United States.	
Trajectory Energy Partners (43.3 MegaWatts13-Project Community Solar Portfolio in United States)	A portfolio of 43.3 MegaWatts13-Project Community Solar Portfolio located in United States.	

Company Name	Description	Deal Synopsis
Viking Turbine Services	Provider of field engineering, consultancy, and technical oversight services for gas and steam turbine outages intended to support turbine maintenance and repair activities. The company offers outage planning, technical consultancy, technical direction, customer representation, quality control inspections, parts repair oversight, and project management, enabling power generation companies to manage turbine outage execution and repair work.	
Waveland Capital Group (21 Wells Project In Permian Basin, United States)	21 Wells Project in the Permian Basin, United States
