Information Technology Deals for October 2026

There were 83 completed U.S. private equity deals in the Information Technology sector during the month of October. The number of deal transactions decreased 18.6% when compared to September's deal count. There was a 32.0% decline in the number of Information Technology deals compared to October 2025.

Information Technology Deals for October 2026

Company Name	Description	Deal Synopsis
3verest	Developer of a sovereign cloud platform designed for healthcare data and artificial intelligence workloads. The company offers a sovereign cloud platform, clinical application hosting, and data management alongside AI workload optimization and cybersecurity governance, enabling healthcare providers and imaging OEMs to power their medical systems through specialized infrastructure and localized data residency.	
Access Systems (IT Consulting and Outsourcing)	Provider of security integration services intended to protect commercial and government facilities. The company implements security infrastructure through a partnership-based approach with vendors and clients, utilizes low-voltage systems expertise for complex security deployments, provides customized security applications tailored to specific operational requirements, and integrates multiple security layers into unified platforms, enabling commercial and government clients to secure facilities using integrated electronic monitoring and entry management.	
Alta Data Technologies	Manufacturer of avionics interface products intended for the aerospace and defense sectors. The company offers interface cards, ethernet converters, appliances, ruggedized cable assemblies, and a modular software development kit, providing systems integrators and military platform developers with high-density, multi-protocol solutions, enabling clients to facilitate data exchange between avionics subsystems, simplify wiring complexity, and maintain software continuity from prototyping to deployment.	
Arbour Group	Provider of regulatory compliance and validation services intended for risk management in life sciences. The company offers software assurance, digital compliance, and managed services, thereby enabling pharmaceutical, biotechnology, medical device, and diagnostic markets to maintain regulatory adherence while reducing operational costs.	
Atlantic Computer Services	Provider of managed IT services and support intended to support small businesses in Southeastern North Carolina. The company offers cybersecurity, cloud management, VoIP phone systems, cloud services and IT consulting, enabling professional firms and nonprofits to maintain reliable computer networks and meet industry compliance standards.	

Company Name	Description	Deal Synopsis
Aucoin Telecom & Utility Construction	Provider of infrastructure construction and maintenance services intended for the telecommunications and power industries. The company offers aerial and underground construction, fiber splicing, cell site builds, transmission tower maintenance, and generator installations, enabling utility operators and telecom providers to build and repair critical infrastructure across regional markets.	
Banner	Developer of capital expenditure management software designed to provide real-time visibility and control across real estate portfolios. The company's platform provides real-time, portfolio-wide visibility, automated workflows for budgeting and approvals, deep integration with property management systems, SOC 2 Type II compliance, and 256-bit SSL encryption, enabling commercial real estate owners to centralize project documents and automate administrative tasks to reduce project delivery time.	
Blue Hill Data Services	Provider of mainframe hosting and managed information technology (IT) services intended to support mission-critical information technology (IT) infrastructure. The company offers mainframe hosting, as/400 i-series hosting, server hosting, colocation services, disaster recovery services, and remote support services, providing government agencies and commercial enterprises with onshore private cloud solutions and technical expertise to ensure continuous system uptime.	
Business Cyber Security Solutions	Provider of cybersecurity services intended to help managed service providers deliver security and compliance solutions. The company utilizes a proprietary cybersecurity pyramid framework and a white-label delivery model, providing virtual chief information security officer services, managed security operations, threat detection and response, vulnerability assessments, regulatory compliance support, and penetration testing, enabling managed service providers to expand their service capabilities and meet regulatory requirements without increasing internal headcount.	
Carus	Provider of hardware and software services designed for automated check-in and boarding; and routines for customer relationship management and business intelligence. The company's services offer to design, develop, and deliver reservation and check-in systems and e-commerce applications to the cruise and ferry industry in Europe, North America, the Baltic, the Pacific Ocean, Australia, Africa and internationally, enabling clients in the travel and transport industry to meet the ever-changing operational demands.	

Company Name	Description	Deal Synopsis
Channel99	Developer of a b2b marketing technology platform intended for investment optimization and attribution. The company offers marketing attribution, account identification, AI-driven investment optimization, b2b ad verification, and paid search optimization services, enabling enterprise marketing teams to connect digital spend to pipeline outcomes and revenue.	
Charted (ERP Services Practice)	Provider of enterprise resource planning services intended for growing and middle-market companies. The company offers platform implementation, system configuration, software customization, managed services, maintenance support, and advisory services, enabling organizations to optimize their business systems and scale operations efficiently.	
Cleartrace Technologies	Developer of energy and carbon accounting technology designed to accelerate and scale renewable production without massive subsidies. The company's technology implements digital infrastructure to create accurate and verifiable energy emissions data, enabling corporations, real estate owners, and renewable energy suppliers to achieve their sustainability and financial goals.	
Cloud 9 ERP Solutions	Provider of ERP implementation services intended to help businesses streamline operations through cloud-based management software. The company offers specialized industry knowledge, a white-glove implementation process, individualized workflows, open application programming interfaces, audit trails, and access controls, providing small and mid-sized businesses with the ability to automate sales orders and monitor shop floor performance in real time.	
CloudWave (Marlborough)	Provider of technical systems integration and cloud services intended to exclusively serve the healthcare industry. The company's service offering includes managed hosting, disaster recovery, backup as a service and archiving, as well as security and end-to-end technical, clinical and user support services, enabling hospitals and healthcare organizations to migrate critical information technology (IT) services to secure, performant, highly available multi-cloud platforms.	
Daelight Solutions	Operator of a life science business and technology consultancy firm intended to help life science companies with various tasks. The company offers consulting services in various areas such as clinical, regulatory, pharmacovigilance, quality, manufacturing, and commercial, enabling customers to optimize their business processes through system migrations, system implementations, and business process optimization.	

Company Name	Description	Deal Synopsis
Data Surge	Provider of data and artificial intelligence services intended for commercial and public sector organizations. The company offers data architecture design, AI/ML implementation, solution accelerators, managed data services, enterprise data centralization and data quality assessment, enabling clients to modernize their data systems and automate business processes.	
Diesel insurance solutions	Developer of a truck insurance platform designed to support insurance underwriting and risk assessment using telematics and dashcam data. The company offers data-driven underwriting, detailed driver risk identification, online quoting tools and insurance carrier partnerships, enabling truckers and fleet operators to obtain coverage and identify high-risk driving behavior.	
Dragon Army	Provider of digital agency services intended to build brands and digital experiences. The company utilizes behavioral psychology, engagement drivers, and applied game theory, providing large enterprises with brand identity, user experience design, mobile application development, web development, augmented reality, and digital marketing to drive business growth and brand engagement.	
EarthLink	Provider of internet services intended to facilitate high-speed digital connectivity. The company utilizes fiber optic, 5G wireless, and satellite technologies to deliver network access across residential and commercial sectors, providing data transmission and security tools for users to maintain online connections.	
Elementary Data	Developer of a data warehouse monitoring platform designed to alert users of any data issues. The company's platform stores all of the logs, metadata, and metrics it collects and generates in a data warehouse so that users can add their own detections and logic and also has a data build tool package that can be easily installed in a data environment, enabling data teams to detect problems in their data before their clients do.	The company was acquired by Boomi, via its financial sponsors Blue Owl Capital, Francisco Partners, Golub Capital, Golub Growth, Sixth Street Partners and TPG, through a $42.5 million LBO on October 19, 2026.
Equify Advisors	Provider of business systems consulting and advanced analytics services intended for growing organizations. The company offers netsuite implementation, erp optimization, and data warehousing alongside artificial intelligence and machine learning solutions, enabling finance and accounting departments to streamline operational processes and gain actionable insights through integrated technology and data-driven decision support.	

Company Name	Description	Deal Synopsis
Ethiqly	Operator of a digital writing platform intended to enhance writing instruction. The company's AI-powered teaching assistant helps teachers give personal, contextual feedback to every student without adding and offers features such as insight tracking and custom rubrics and centralizes information while freeing up headspace for teachers to focus on their craft, enabling users to support students throughout the writing process to promote engagement.	
Falcata	Provider of engineering services intended to support advanced sensor and radar technologies. The company offers engineering services, radar systems, fire control systems, sensor simulation software, microwave test equipment, and technical life cycle support, providing government agencies and private industry with specialized technical expertise for defense and aviation applications.	
Fastwyre Broadband (Nebraska Business Operations)	Provider of telecommunications and broadband services intended for residential and commercial customers. The company offers fiber-optic internet, digital voice, cable television, and cellular phone services, enabling users in rural and underserved communities to access high-speed connectivity and integrated communication solutions without long-term contracts.	
Flightline (Business/Productivity Software)	Developer of an ai-native commercial due diligence platform intended to assist private equity investors with market analysis. The company's platform utilizes agentic technology to coordinate research and analysis across multiple data sources, enabling investors to evaluate a larger volume of deals and generate investor-ready market studies through structured workflows and consultant review.	
Fraxion Spend Management	Developer of cloud-based spend management software designed for easy procurement management. The company's platform offers purchase requisitioning, expense and approval management with advanced analytics as well as automates the procurement cycle and streamlines procure-to-pay processes with complete visibility and policy compliance, enabling middle-market companies to make better purchasing decisions in real-time with live budget visibility and risk analytics.	

Company Name	Description	Deal Synopsis
Freeit Data Solutions	Provider of IT and cybersecurity services intended to help organizations manage and secure data. The company offers data center design, cybersecurity deployment, cloud migration, software-defined storage, and data replication services, enabling mid-to-large-sized organizations to simplify technology implementation and strengthen operational continuity.	
FreeStar	Developer of a monetization software designed for online publishers. The company's software provides custom header bidding, reporting as well as application monetization to provide financial assistance to websites, enabling clients to outsource their advertising sales function and capture increased advertising revenue.	
Geniez AI	Developer of an AI-driven enterprise solutions company designed to modernize legacy systems by integrating generative AI into mainframe applications. The company offers a smart terminal platform that combines payments, returns, reservations and inventory management with GenAI-powered enhancements, enabling customers to streamline operations, reduce manual overhead and unlock new efficiencies from traditionally rigid infrastructure.	The company was acquired by Rocket Software, via its financial sponsors Bain Capital and Ergo Partners, through a $100 million LBO on October 13, 2026.
Get Engaged	Provider of influencer marketing services intended to enhance brand visibility and engagement. The company utilizes cross-platform orchestration and proprietary technology to build connections between celebrities, creators and brands, providing entertainment and retail sectors with campaign ideation, social media management, influencer marketing, community management, brand strategy and talent partnerships to drive audience engagement.	The company was acquired by SAMY Road, via its financial sponsor Bridgepoint Group, through a $100 million LBO on October 6, 2026.
Gooch & Housego	Manufacturer of photonics components intended for aerospace, industrial, and life sciences applications. The company offers optical filters, laser protection, periscopes, sighting systems, fiber-coupled devices, and lithium niobate wafers, enabling optical components and integrated photonic subsystems for harsh environments and diagnostic equipment.	The company was acquired by Arlington Capital Partners through a GBP 345.6 million public-to-private LBO on July 16, 2026. The transaction was supported by $300 million of debt financing. Under the terms of the agreement, shareholders of the company will receive 1,230 pence in cash for each share they hold, plus a previously declared interim dividend of 4.9 pence per share, for a total value of 1,234.9 pence per share.
Ground Signal	Developer of an audience analytics platform designed to understand and reach real-world consumers and individual influencers. The company's platform uses location-based technology that provides insight into real customer profiles and behaviors, enabling businesses to build marketing strategies, optimize on-premises activation, and improve commercial sales.	

Company Name	Description	Deal Synopsis
Halcyon Days Consulting	Provider of defense technology services intended to build tactical mission networks and operational software for military forces. The company offers tactical mission networks, operational software development, cybersecurity services, systems integration, training services, and foreign partner enablement, providing defense agencies with resilient communication architectures and custom mission applications for use in contested environments.	
Humanlinker	Developer of artificial intelligence-guided technology designed for the revenue team to make better sales interactions. The company's platform allows users to build an account-based selling strategy and get account recommendations, identify strategic accounts ready to be assigned to the sales team using AI algorithms, and track all the relevant data to understand accounts, enabling companies to make better sales interactions.	
Industrial Design Solutions	Provider of industrial control engineering and distributed control system engineering services intended to support process automation in industrial plants. The company offers control strategy design, consulting, hardware and software engineering, simulation systems, and control system IT support, enabling power generation and other industrial facilities to operate and maintain their process control systems.	
International Business Machines (VMware Cloud Service Provider Business)	Provider of managed cloud services intended to modernize critical workloads. The company utilizes vmware cloud foundation, provides integrated cloud infrastructure, supports complex enterprise migrations, offers global platform reach, integrates cyber resilience, and leverages virtualization experience, enabling enterprise cloud infrastructure and managed IT services to modernize critical workloads and manage enterprise cloud infrastructure.	
Jackson Technical	Provider of managed IT services intended for small and mid-sized businesses. The company offers managed IT services, computer hardware services, windows and macintosh integration, voip phone support, web hosting, and database design, enabling clients to maintain secure and efficient technical infrastructure through direct access to dedicated engineers.	

Company Name	Description	Deal Synopsis
JBF Consulting	Operator of a supply chain execution consultancy company intended to help clients in need of transportation management system enhancements and supply chain visibility improvements. The company specializes in supply chain execution strategy and systems integration with reporting, data management, analytics, transportation modeling and supply chain design tools and offers services such as logistics technology implementation, software customization, and supply chain analytics and optimization, thereby helping clients with strategic guidance on their deployment strategy.	
Jitsu (Database Software)	Developer of an open-source data integration platform designed to collect, correlate, and perform an action based on customer intentions. The company's platform seamlessly and securely integrates with systems and automatically acts on key findings as well as provides an event application program interface for exporting events to its analytics and prediction system, enabling tourism, retail, healthcare, and other industries to have real-time insights and analysis at every step of the process.	
KL Software Technologies	Developer of digital workplace software designed to modernize legal operations. The company offers an intelligent search platform, document management integration, an enterprise intranet, collaboration software, and artificial intelligence agents, enabling law firms to automate processes and improve business performance through integrated technology environments.	
Legets	Developer of an AI-powered legislative intelligence platform designed to track hr and compliance laws. The company offers AI-powered legislative tracking, regulatory change detection, automated action planning, plain-English legal interpretation, multistate compliance monitoring, and audit-ready documentation, enabling employers to monitor legislative changes across all fifty states to avoid compliance gaps.	
Linxup	Developer of fleet management software intended to serve the fleet tracking needs of small, medium, and large businesses. The company's software is a GPS-based fleet management tool that includes features like vehicle maintenance tracking, safety monitoring, activity alert, management reporting, and a dashboard, enabling small and medium-sized businesses to reduce fuel usage, improve safety, increase productivity, and monitor and track their fleets.	

Company Name	Description	Deal Synopsis
Lumi AI	Developer of an artificial intelligence-powered generation platform designed to find insights that drive financial results. The company's platform uses a network of artificial intelligence agents to empower users with the ability to instantly extract actionable insights and generate custom reports using plain language, enabling organizations to boost productivity and make better data-driven decisions.	
ModernLoop	Developer of interview scheduling software intended to coordinate interview scheduling workflows across hiring processes. The company's software offers interview scheduling, candidate self-scheduling, interviewer availability management, calendar coordination, and system integrations, enabling recruiting teams to arrange and manage interviews through a centralized platform.	
Momentum Telecom (Cloud Voice and Collaboration Business)	Provider of cloud voice and unified communications services intended for the enterprise sector. The company offers cloud phone systems, unified communications platforms, managed network connections, SD-WAN solutions, contact center software, mobile collaboration tools, video conferencing services, SIP trunking, internet connectivity management, and technical support services, enabling clients to communicate efficiently.	
MontanaSky Networks	Provider of broadband internet and telecommunications services intended to connect residential and commercial customers. The company offers fiber-optic, fixed wireless, and cable internet with low-latency connectivity, local technical support, and coverage for rural areas, enabling homes, businesses, and property developments to access reliable high-speed internet.	
Music Reports	Developer of music rights administration software designed for licensing and royalty management. The company's technology utilizes rights matching, automated royalty accounting, cue sheet management, license administration, and a music rights registry, providing a licensing marketplace, royalty payment processing, cue sheet software, and catalog auditing to digital streaming services and broadcasters, enabling users to clear music rights and manage global royalty payments.	
NetGalley	Operator of an easy-to-use online service and connection point intended to book advocates and industry professionals. The company's platform provides online service and connection points for book publishers, reviewers, media, librarians, booksellers, bloggers and educators.	

Company Name	Description	Deal Synopsis
Netnumber	Developer of phone number intelligence data services platform committed to empowering telecom operators and enterprises around the world. The company's technology provides carrier identification, fraud prevention registries, number verification, sim swap detection, know your customer matching, and dynamic do-not-originate services, enabling telecommunications operators and financial enterprises to optimize global communication routing and strengthen digital identity protection.	
Off Duty Management	Provider of administrative support, technology, and liability protection intended to assist law enforcement agencies in the administration and execution of their off-duty program and assignments. The company supports and protects law enforcement agencies, their officers, and community businesses by delivering a customizable, centrally administered no-cost solution to manage several aspects of off-duty programs and keep agencies in control mitigating risk and liability.	The company was acquired by Extra Duty Solutions, via its financial sponsor Bregal Sagemount, through a $72.5 million LBO on October 6, 2026.
Oktana	Provider of Salesforce and AI integration services intended to help companies prepare for artificial intelligence. The company provides Salesforce integration, AI agent creation, MuleSoft connectivity, real-time data connection, journey automation, identity resolution, RPA deployment, and SOC 2 compliance, enabling businesses in the healthtech and fintech sectors to unify their crm and cloud data into a single layer for automated decision-making.	
Omata	Developer of a global positioning system (GPS)-based speedometer designed to display speed, distance, ascent, and time in real-time to cyclists. The company's speedometer provides real-time tracking and ride data in an analog form, enabling cyclists to know details about the distance to be covered, the time elapsed, the speed of the cycle, and its vertical ascent in analog form for visibility.	
Optimize365	Developer of an multi-tenant Microsoft 365 automation platform designed to assist managed service providers (MSP) and managed security service providers (MSSP) in streamlining and automating the management of Microsoft 365 security and compliance tasks. The company's platform offers various features include as automated security baselines, multi-compliance mapping, predictive configuration impact, psa integration, automated project scoping & sow creation, user impact analysis, and more.	

Company Name	Description	Deal Synopsis
Oso	Developer of a backend infrastructure security platform designed to simplify the integration of authorization into the software development process. The company offers a normalized and consistent interface for core security controls for authentication, authorization, end-to-end encryption, and auditing, enabling developers to build and maintain secure infrastructure and applications.	The company was acquired by Tiny Capital through a $1.9 million LBO on October 1, 2026.
Peregrine.ai	Developer of an AI-powered perception application designed to offer visual intelligence from edge-to-cloud through an end-to-end approach. The company's platform makes cameras in cars convenient and generates real-time insights for transportation, geolocation, and mapping services and its flywheel refines data assets and AI algorithms, enabling clients to build a safe and sustainable traffic ecosystem for all with an SDK.	
PickTrace	Developer of an agricultural analytics platform designed to assist farmers in achieving optimal productivity. The company's platform leverages technology to improve communication between departments with the delivery of real-time data and data tracking, including time, attendance, harvest data, and crop yield, enabling farming organizations to coordinate and work as a team.	
Quantum Building Solutions	Provider of building automation and energy management services intended for the commercial and industrial sectors. The company offers HVAC controls, lighting automation, systems integration, energy management solutions, building system retrofits, and performance monitoring, providing facility owners with optimized building operations and energy efficiency.	
Realtycom Partners	Provider of telecommunications consulting services intended to deliver revenue sharing on internet and broadband services for multifamily residence owners. The company offers telecom consulting, contract negotiation, telecom management, revenue auditing, managed wi-fi services, smart home building services, and construction administration, enabling multifamily property owners and developers to maximize ancillary revenue and optimize low-voltage infrastructure across their portfolios.	

Company Name	Description	Deal Synopsis
RED Group (Construction and Engineering)	Provider of industrial control systems services intended for industrial and mission-critical infrastructure. The company offers the C-SIS methodology, operational technology infrastructure engineering, programmable logic controller programming, supervisory control and data acquisition integration, distributed control system configuration, and human-machine interface development, intended to help clients automate processes and ensure operational resilience.	
RedLine Performance Solutions	Provider of high-performance computing solutions for supercomputing sites. The company specializes in complex systems integration, from planning to implementation, and offers IT infrastructure management and technical support services. RedLine's proprietary Redline Performance Methodology (RPM) maximizes customer success, and the company has partnerships within the HPC vendor, data center, and cloud services communities.	
Responsive Information Management Systems and Services	Provider of dealer management software intended for the agriculture, construction, and transportation sectors. The company offers an integrated Microsoft-based platform featuring real-time accounting, OEM integrations, and mobile service tools, enabling equipment dealers to facilitate departmental connectivity and streamline business operations through unified data management and reporting.	
Rosetree Solutions	Provider of technology consulting services intended to help organizations adopt enterprise software and artificial intelligence. The company utilizes forward-deployed engineers and autonomous agent technology to build digital labor systems, enabling middle-market and enterprise companies to optimize business processes and increase operational efficiency.	
Saige Consulting	Provider of artificial intelligence and technology consulting services for public- and private-sector organizations. The company offers AI consulting, technology strategy, software development, cloud migration, data architecture design, workflow automation, change management support, due diligence insights, demand prediction, and personalized customer engagement, enabling clients to modernize operations.	

Company Name	Description	Deal Synopsis
SIMPL Wireless	Developer of an IoT connectivity management platform designed to simplify global device deployments. The company offers the Compass platform, unified APIs, and lifecycle management, enabling enterprises to manage every connection and carrier contract through a single dashboard while maintaining device uptime with automatic network switching.	
Softdocs	Developer of enterprise content management software intended for higher education. The company offers a robust set of enterprise content management products including document management, electronic forms, workflow automation and print customization solutions that reduce the need for paper, improve student service and employee productivity, enabling educational institutions to digitize and electronically manage content, deploy mobile-friendly electronic forms and automate time-intensive workflows.	
SolidFuture	Developer of software services intended to transform ideas into production-ready applications. The company utilizes an artificial intelligence-driven development methodology that converts natural language instructions into functional code, enabling commercial construction subcontractors to accelerate the transition from initial concept to a market-ready product.	
Stavvy	Developer of a digital mortgage vendor platform intended to grow business by ditching the paper process. The company's platform allows easy and secure communication and access to vendor data and deliverables without fragmentation or exposure to unnecessary risk, and it also leverages the power of web conferencing technology to conduct virtual closings and meetings, enabling mortgage banking professionals to maintain compliance and reduce operational complexity.	
Stride Consulting	Operator of an agile software development consultancy intended for technological transformation. The company offers product design and development, staff augmentation, web performance optimization, product assessment, and digital strategy services, enabling clients to get quality assistance in minimum viable product designing and launch.	
Suite	Operator of a financial analytics and software company intended to provide banks, hedge funds, and trading platforms. The company The company's platform offers industry-grade financial analytics software, delivering robust pricing, risk management, and valuation functions across multiple environments and programming languages, enabling customers to streamline operations.	

Company Name	Description	Deal Synopsis
SummerOS	Developer of a short-term rental intelligence platform designed to optimize asset performance. The company's platform integrates with property management systems to centralize revenue forecasting, market intelligence, and portfolio insights, enabling short-term rental managers to underwrite new properties and track performance against competitive sets.	
SV Techsol	Manufacturer of industrial equipment designed for semiconductor and pharmaceutical applications. The company offers frames, enclosures, static control products, custom applications, semiconductor equipment, and industrial hardware, helping semiconductor and pharmaceutical customers increase productivity and manufacturing yields.	
Synack	Developer of a crowdsourced security platform designed to deliver smart penetration testing to security teams. The company's platform leverages artificial intelligence-enabled technology to give customers access to human intelligence and machine intelligence, enabling security teams to get a scalable and efficient way to test their attack surfaces on a continuous cadence and get actionable results.	
Synaptic Era (Salesforce Technology and Services Business)	Provider of Salesforce consulting services intended for digital modernization. The company offers public-sector services, OmniStudio implementations, Agentforce deployments, healthcare grants management, licensing and permitting systems, and constituent-facing digital programs, enabling federal agencies and healthcare organizations to deploy industry-specific AI agents and automate complex workflows.	
Tideworks Technology	Developer of terminal management and graphical planning software specializing in container terminal operating systems for growing marine and rail terminals worldwide. The company offers terminal operating systems and graphical planning solutions for marine and intermodal terminal operations around the world.	
Tiger Pistol	Developer of a collaborative advertising platform designed to automate localized marketing campaigns. The company's platform utilizes Artificial Intelligence (AI)-driven automation to manage campaign publishing, creative localization, media funding, and performance reporting across social and search channels, enabling franchises and multi-location brands to scale digital advertising while maintaining brand control.	

Company Name	Description	Deal Synopsis
Trace One	Developer of a SaaS-based collaborative software intended for private label management. The company's platform has multiple interlocking business applications, including product lifecycle management, sourcing and compliance, thereby enabling clients to innovate, speed up the time to market and ensure teams are efficient.	
Trustpair	Developer of a fraud prevention platform designed to protect against credit transfer fraud. The company's platform automates bank account verification and monitors vendor data changes in real time, enabling finance departments to prevent unauthorized payments and improve operational efficiency.	The company was acquired by Basware, via its financial sponsors Accel-KKR, Briarwood Capital, Long Path Partners and Salem Capital Management, through $85 million LBO on October 1, 2026.
Us Communications and Electric	Provider of technology integration services intended to deliver network infrastructure and communication systems. The company offers audio-visual systems, distributed antenna systems, network infrastructure, security solutions, iot integration, and wireless networking, providing healthcare and education sectors with integrated building technologies to support collaborative environments and operational efficiency.	
Usherpa	Developer of customer relationship management solution designed for loan officers and realtors to enhance relationship engagement. The company's platform utilizes data intelligence and multi-channel marketing to provide content marketing, daily task reminders, database management, lead source integrations, email analytics, detailed reporting and other related features, thereby enabling clients to build productive relationships, generate referrals and grow their business.	
Velou	Developer of a product data enrichment platform designed to support retail e-commerce infrastructure. The company offers a retail-specific commerce model, intelligent product tags, structured attribute generation, and dynamic product graphs, enabling businesses to transform unstructured catalogs into context-rich data for agents and search engines.	
Vubiquity	Provider of multi-platform video services designed to connect content owners and service providers. The company specializes in content processing and distribution, direct-to-consumer streaming and monetization, systems integration and professional services, thereby providing clients with enhanced digital content capabilities.	

Company Name	Description	Deal Synopsis
Weave (Lehi)	Developer of an integrated communications platform intended to help healthcare practices and small businesses automate tasks and manage patient communications. The company's platform combines software communication and analysis tools with cloud-based phone services, enabling dental and medical service providers to automate repetitive administrative tasks and manage all patient interactions from a single integrated system.	The company was acquired by Francisco Partners and Sixth Street Specialty Lending BDC through a $701.4 million public-to-private LBO on October 26, 2026. The transaction was supported by $240 million of debt financing.
