# Materials and Resources Deals for October 2026

There were 23 completed U.S. private equity deals in the Materials & Resources sector during the month of October. The number of deal transactions increased 35.3% when compared to September's deal count. There was a 15.0% increase in the number of Materials & Resources deals compared to October 2025.

# Materials and Resources Deals for October 2026

| Company Name | Description | Deal Synopsis |
|---|---|---|
| Advanced Barrier Extrusions (ABX Manufacturing Facility in Pewaukee, Wisconsin) | A printed packaging and specialty labels manufacturing facility located in Pewaukee, Wisconsin. The asset produces flexible packaging, folding cartons, and conductive films with in-house ink formulation, enabling industrial and consumer brands to access integrated labeling and functional printing solutions through a single-source manufacturing partner. | |
| Attain Cosmetics | Manufacturer of nail cosmetics designed for providing allergy-conscious gel products to home users. The company offers allergy-conscious formulation, hema-monomer free chemistry, domestic manufacturing, technical education delivery, e-commerce distribution, and community-driven product development, enabling consumers to create professional-style gel nails at home while accessing technical knowledge to understand product chemistry. | |
| Aunutra Industries | Manufacturer of botanical extracts and nutritional ingredients intended for the nutraceutical and pharmaceutical sectors. The company offers standardized herbal extracts, vitamins, amino acids, and specialty ingredients, providing clients with non-irradiated products processed through steam and ozone sterilization within ISO-certified manufacturing facilities. | |
| BioBlend | Manufacturer of biodegradable industrial lubricants intended for environmental responsibility and safety. The company offers rock drill oil, dust suppressant, gear oil, hydraulic circulating oil, grease, food grade lubricants, built for mining, marine, and agriculture sectors to provide sustainable alternatives to petroleum-based products. | |
| Box City | Developer of modular living innovations intended to provide flexible and efficient housing options. The company's platform utilizes customizable design and sustainable materials to create compact living spaces that can be easily adapted to various needs, enabling clients to address housing shortages while promoting a more sustainable and community-focused approach to living. | |

| Company Name | Description | Deal Synopsis |
|---|---|---|
| Canworks | Provider of printing services that directly print onto aluminum cans intended to offer quality beverage cans to breweries. The company takes blank aluminum cans, prints them digitally, and features full-CMYK (cyan, magenta, yellow, and key black) color profiles which ensure there are no seams, and no color separation, enabling beverage companies to purchase the printed cans in the market in smaller quantities. | |
| Centor (Ohio) | Manufacturer of prescription packaging products intended for retail pharmacies and healthcare wholesalers. The company offers plastic vials, closure systems, PET bottles, ointment jars, droppers, and applicators, enabling pharmacists to provide regulatory compliant and child-resistant containers for oral medications. | The company, a subsidiary of Gerresheimer, was acquired by Apax Partners through an estimated $1.71 billion LBO on October 1, 2026. The transaction was supported by $ 500 million of debt financing. |
| Clysar | Manufacturer of polyolefin shrink film designed for display packaging and product protection. The company's technology produces high-performance thin films, recyclable wraps, and anti-fog materials that provide high-clarity optics and durability for food, retail, and industrial markets, enabling distributors and end users to secure products while enhancing shelf appearance and maintaining shelf life. | |
| Creedence Energy Services | Provider of production and midstream chemical services intended for the oil and gas industry. The company offers customized chemical programs, acidizing, stimulation treatments, scale remediation, and technical laboratory services, enabling energy producers to optimize well performance, reduce freshwater injection volumes, and protect infrastructure assets through proprietary-formulated chemistries and advanced analytical solutions. | |
| Cruz Foam | Manufacturer of biodegradable foam materials intended to replace petroleum-based packaging. The company offers sustainable shipping coolers, protective foam inserts, block and brace protection, wine shipping solutions, cold chain insulation and compostable foam sheets, enabling clients to reduce plastic pollution through circular and compostable packaging alternatives. | |
| EspriGas | Provider of medical and industrial gases intended for food and beverage, healthcare, construction and manufacturing industries The company offers nitrogen, oxygen, helium, propane, carbon dioxide and medical mixtures, enabling clients to receive a proper gas supply network for their requirements. | |

| Company Name | Description | Deal Synopsis |
|---|---|---|
| Keystone Pallet and Recycling | Manufacturer of wood packaging products intended to serve industrial and logistics companies in the United States. The company specializes in new pallets, recycled pallets, reconditioned pallets, lumber products, freight services, pallet recycling programs, and other services, thereby enabling clients to transport goods efficiently and support material reuse through recycling and recovery initiatives. | |
| Monadnock Non-Wovens | Manufacturer of meltblown nonwoven fabrics designed for technical filtration and protective applications. The company utilizes proprietary fiber production equipment, hydrocharging technology, calendering processes, and composite layering capabilities to produce synthetic media, air filter media, liquid filtration media, respirator media, surgical facemask media, and lofted nonwovens, enabling converters to meet global standards for air purification and healthcare protection. | |
| Noble Biomaterials | Manufacturer of advanced materials designed for antimicrobial protection and electrical conductivity. The company engineers proprietary technology platforms that deliver odor elimination, infection prevention, and electromagnetic interference shielding, providing healthcare, aerospace, and defense markets with lightweight, flexible conductive materials for thermal and radar signature management. | |
| Pacific Ag | Operator of a crop residue harvest and supply platform intended to provide agricultural feedstock. The company offers biomass harvesting, logistics, and supply chain management services, enabling growers to generate additional income from excess crop residue while providing industrial customers with consistent and traceable feedstocks for renewable energy, animal feed, and compost production. | |
| Packaging Design | Manufacturer of custom corrugated packaging intended for the retail and e-commerce sectors. The company offers custom corrugated boxes, subscription packaging, point-of-purchase displays, retail packaging, industrial packaging, promotional mailers, providing in-house structural design and advanced die-cutting capabilities to enable manufacturers to enhance product presentation and optimize production efficiency. | |
| Permagreen Organics Company | Manufacturer of organic soil products designed for soil health improvement. The company offers soil amendments, decorative mulch, raised bed soil, mushroom compost, landscaping aggregates and soil conditioners, providing home gardeners with nutrient-rich growing mediums that enhance drainage and moisture retention. | |

| Company Name | Description | Deal Synopsis |
|---|---|---|
| Polymer Technologies | Provider of polymer gel services intended to increase hydrocarbon recovery and reduce operating costs. The company's systems utilize hydrophilic bonding chemistry, polyacrylamide injection, cross-linker gelation, reservoir drainage modification, thief zone blocking, annular gel systems, clay stabilization, and wettability improvement, enabling oil and gas operators to access water shutoff treatments, conformance control, vertical profile modification, casing leak repair, annular gel systems, and injectivity improvement. | |
| Research Solutions Group | Provider of chemical distribution and environmental services intended for industrial businesses. The company offers industrial solvents, specialty chemicals, metalworking fluids, industrial cleaners, degreasers, and custom solvent blends, enabling automotive and manufacturing operators to manage chemical procurement and waste recycling through a single regional partner. | |
| Surface Tech | Manufacturer of asphalt additives designed for the extension of pavement service life. The company utilizes high-strength aramid fibers and automated dosing systems to provide three-dimensional reinforcement within asphalt and concrete mixes, enabling the construction and building materials industry to increase road durability and reduce long-term maintenance costs. | |
| Sustana Fiber | Manufacturer of recycled paper designed to bring fiber products full circle to the world. The company offers recycled paper products and sustainable, recycled fiber used for paper products and food-grade packaging through automated, proprietary processes and computerized monitoring systems, enabling clients to take the initiative in going green regarding production and packaging. | |
| Ultra Green Packaging | Manufacturer of sustainable food packaging products intended to serve the foodservice industry. The company offers oven-safe pizza pans, sushi trays, and portion cups made from tree-free plant-fiber materials and high-heat engineering, enabling foodservice operators to provide compostable, oil-resistant, and microwaveable packaging that withstands temperatures up to 425 degrees Fahrenheit. | |

| Company Name | Description | Deal Synopsis |
| --- | --- | --- |
| Wilderness Land Management | Provider of utility vegetation management services intended to maintain critical infrastructure. The company offers utility vegetation management, right-of-way clearing, large-scale land clearing, forestry mulching, mowing services, and tree removal, enabling utility companies and pipeline operators to improve service reliability through professional land maintenance and specialized line clearance protocols. | |
